

# foRMAtion Teaching Material

IO3 foRMAtion teaching material for the international curriculum for RMAs

**Date:** 17/10/20

**Version:** 1.1

**Author(s):** Lídia Vinczéné Fekete and Éva Kőváriné Ignáth, Corvinus University of Budapest (CUB)

**Contributor(s):** Magdolna Daruka (CUB), Judit Sass (CUB), Beáta Paragi (CUB), Judit Fekete (CUB)

Project: foRMAtion | [www.formation-rma.eu](http://www.formation-rma.eu)

Project duration: 01.09.2019 – 31.08.2022

Co-funded by the  
Erasmus+ Programme  
of the European Union

This project has received funding from the European Union's Erasmus+ programme under the registration number 2019-1-HU01-KA203-061233.

Table 2 – Versioning and Contribution History

# 1. Executive Summary

Intellectual Output 3 (IO3) aims to develop the teaching material for the international curriculum for future Research Managers and Administrators (RMAs), which includes various innovative educational tools, to develop students' professional and transversal skills. In line with the outcomes of the transnational meetings and the main findings of the methodological guide and good practice collection (IO1), the curriculum and the teaching material is based on the "learning outcome approach", fostering a student-centred teaching-learning process, and applying several modern and innovative educational tools and methodologies such as Problem Based Learning.

It provides tools and methods for instructors to develop students' most important soft skills that they might need as RMAs such as cooperation, (written and oral) communication, problem solving, flexibility, time management, networking, negotiation etc. The development of these skills and competences is enhanced not only by the application of innovative teaching methods but also by shaping teachers' attitude and views on their role in the learning process and on the goals of the learning process. Several activities aim to enhance the digital skills of the students and their familiarity with working with different applications and online interfaces. The ability to exploit these tools is becoming increasingly important, as they enable a more flexible and more efficient work and they provide the conditions for a smooth collaboration for teams in an online environment. In some cases, such as applying different applications for writing quizzes or brainstorming, involvement of digital tools serves the purpose of making the teaching-learning process more playful for students, thus contributing to increase their engagement. Each lesson includes activities which require the cooperation of students, and the learner-centred approach facilitates interactivity.

IO3 (teaching material for the international curriculum for Research Managers and Administrators) is one of the first three intellectual outputs of the foRMAtion project. Based on the Application Form, the objective of IO3 is to elaborate a teaching material that gives guidance to the instructors attending the teachers training activity within foRMAtion project (C2, Short-term joint staff training event for teachers and professors) and then teaching the curriculum (see IO2). When elaborating the teaching material, a learner-centered, practice-oriented approach was applied. The activities, tasks included in the lessons aim to improve the transferable skills of the participating students.

The primary dissemination target group of IO3 are the teachers, lecturers at the participating universities and beyond.

As indirect target groups, researchers and experts involved in HE course-design will also benefit from the teaching material, as well as RMAs and students participating in the RMA courses. The

students in general at the universities and the university management are also target groups from the point of view of dissemination. The methodology of the teaching material for the international curriculum for future RMAs will be adapted to the special needs of the non-formal adult education, thus adults and adult learning providers are also considered as indirect target groups. RMAs already working on the labour market and coordinating teams can also benefit from IO3 when they provide further training for their staff members.

## 1. Introduction

Intellectual Output 3 (IO3) aims to develop the teaching material for the international curriculum for future Research Managers and Administrators (RMAs). The teaching material was elaborated parallel with the IO2 international curriculum, following the modular structure of it.

## 2. Methodology

### Learning outcome approach

The learning outcome approach is a basic principle guiding the elaboration of the teaching material. As a background and starting point for the elaboration of the teaching material, a desk research had been conducted related to the features of the learning outcome approach in HE (guidance to define learning goals and outcomes), and on the identification and formulation of knowledge, skills and attitudes.

Sources such as the European Qualification Framework for Lifelong Learning (EQF, 2008), the homepage of The framework of qualifications for the European Higher Education Area and the Tuning - Educational Structures in Europe (<http://www.unideusto.org/tuningeu/>) give relevant overview of the competence frameworks. Considering the essential EU policy documents and strategies, for the phrasing of learning outcomes, the ECTS (European Credit Transfer and Accumulation System) Guide<sup>1</sup>, as well as the Defining, writing and applying learning outcomes: a European handbook (CEDEFOP, 2017) or the Application of learning outcomes approaches across Europe; a comparative study (CEDEFOP, 2016) proved to be the most adequate and fundamental resources. Research encompassed the academic literature discussing teaching methodology, course/curricula and learning outcome development in HE such as the work of Kennedy et al (2007; 2009)<sup>2</sup> and Bloom taxonomy<sup>3</sup>.

### Reference of existing frameworks and projects:

- [CanMEDS](#) 2015: the most widely accepted and applied physician competency framework in the world; [competence framework](#), [learning outcomes with milestones](#)
- [EQF](#) (European Qualification Framework)
- [ECTS](#) (The European Credit Transfer and Accumulation System)
- [EHEA](#) (European Higher Education Area)
- [BESTPRAC](#)

Hungarian sources compiled on the base of the above mentioned studies also stimulated productive thinking in connection with the teaching material, for example the handbook edited

by Lukács&Derényi<sup>4</sup>, Éva Tót's study<sup>5</sup> on writing learning outcomes or the manual of Éva Farkas<sup>6</sup>. These sources provided useful information regarding the process of formulating learning outcomes starting with the identification of learning goals, competences, and the way of phrasing relevant learning outcomes (giving hints on active verbs).

Teaching methodology: principles and tools

**The main principle** guiding the structure of the curriculum and the teaching material is the constructivist interpretation of teaching-learning process, characterized by

- a student centred approach,
- focusing on the *process* and the *outcome*, not on the *input*
- its main goal, namely the development of the necessary *competences*, while the disciplinary *content* is just a tool to achieve this goal.

**Main tools:** gamification, innovative, various, technology enhanced, interactive tools and methods such as Problem Based Learning (PBL). Flexible learning opportunity and continuous feedback from the teacher are promoted by blended learning and the advanced use of technology.

Taking into account the conclusions of the second transnational meeting (TM2) and the joint staff training event (C1) in Porto and those of IO1, exploring the academic literature on **Problem Based Learning** was carried out. The application of this **student-centered approach** in the modules of the projects could be convenient, since it “empowers learners to conduct research, integrate theory and practice, and apply knowledge and skills to develop a viable solution to a defined problem”<sup>7</sup>. Savery also mentioned several benefits of the PBL approach. The Wiley Handbook of Problem-Based Learning also offers a detailed overview of the approach, namely, (i) origin of the concept and its baseline, (ii) case studies, (iii) proposal of strategies to design PBL and also provides some examples of its application.<sup>8</sup>

The application of the approach in the classroom (examples) is mentioned in the booklet series called “Módszertani füzetek” (Series of Methodological Booklet). The first in the series<sup>9</sup> includes the general methodology, touching upon constructive learning theory and cooperative learning methods, within which PBL is also introduced.

The handbooks of Biggs et al. (2007)<sup>10</sup> and of Fry, Ketteridge and Marshall (2008)<sup>11</sup> provide valuable and useful guidelines regarding the methodology of HE instruction.

Practical cooperative learning techniques (such as expert jigsaw) are described in Spencer Kagan’s book on cooperative learning<sup>12</sup>, and some possible applications are mentioned in the Methodological Booklets. In addition to the aforementioned resources, a number of websites make available up-to-date, innovative and practical information on HE teaching methodology, such as [www.teachthought.com](http://www.teachthought.com), [tanarblog.hu](http://tanarblog.hu), [The Chronicle of Higher Education](http://www.thechronicleofhighereducation.com). The websites of the educational centres of the most prestigious universities like [Teaching and Learning Lab](http://teachingandlearninglab.mit.edu) of the Massachusetts Institute of Technology, [Vice Provost for Teaching and Learning](http://teachingandlearning.stanford.edu) at Stanford University, [Derek Bok Center for Teaching and Learning](http://derekbokcenter.harvard.edu) at Harvard University among others offer insight into the innovative teaching practice of these institutions.

### 3. foRMAtion teaching material for the international curriculum for RMAs

#### *Module 1 Research Methodology and Design*

#### **Lesson 1: Introduction to science - what distinguishes scientific knowledge from other types of knowledge**

Learning outcomes to be developed:

- The student can distinguish and describe the different approaches in scientific theories and epistemological trends, and their scientific history-background (hermeneutical vs scientific, inductive vs. deductive, qualitative vs. quantitative approach, mixed-methods)
- The student is open to perceive and accept the diversity of cultural and social context of research systems and practice
- The student is open for different research methods and is committed to finding consensus in an interdisciplinary research setting

Teaching ideas: Methods, tools, illustration, problem, game etc.	Evaluation and assessment	Timing
<b>a) Games helping students to be connected:</b> getting acquainted with each other <i>15 minutes</i> <ul style="list-style-type: none"> <li>• “Show and tell” see <a href="#">here</a></li> <li>• OR: “Snowball fight”- see <a href="#">here</a></li> <li>• OR: Haiku writing with instructions (Instructions for the poem: first line: the title of the poem (the topic itself, according to the expectations of the students, for example: the RMA profession/research projects; second line: describe the topic with two adjectives; third line: three verbs (expressing action) in connection with the topic; the fourth line: a short sentence that expresses feeling about the topic; the fifth line: one-word synonym of the first line that reflects the essence of the topic.</li> <li>• OR see further ideas <a href="#">here</a></li> </ul>		20 mins

<ul style="list-style-type: none"> <li>• A brief introduction, summary of the modules</li> </ul> <p><b>b) Evaluation of prior knowledge and competences - 10 minutes</b> Exploring the initial competences, knowledge of students: Answers to basic questions by either of the followings</p> <ul style="list-style-type: none"> <li>• Kahoot test (after registering, at <a href="https://kahoot.it">Kahoot</a> homepage, you can create easily games helping assessment <a href="https://kahoot.it">here</a>. Students shall visit <a href="https://kahoot.it">kahoot.it</a> page, where they can type in the game pin and then their name.</li> <li>• or interactive word cloud (<a href="https://www.mentimeter.com/">https://www.mentimeter.com/</a>); students visit the <a href="https://www.menti.com">menti.com</a> page, where they type in the code of the wordcloud.</li> <li>• OR or virtual whiteboard (<a href="https://linoit.com">linoit.com</a> for example)</li> <li>• Closed by teacher's feedback and oral summary</li> </ul> <p><i>(Results (scores) should <b>not</b> be counted into the end of semester grade)</i></p>		10 mins
<p><b>c) Activities helping the understanding of theoretical foundations - 35 minutes</b></p> <ul style="list-style-type: none"> <li>• <b>Jigsaw method</b> (<a href="#">video explanation of the Jigsaw method</a>, <a href="#">written material on the method here</a>): Topics to be included (but according to the teacher's preference, can be changed:             <ul style="list-style-type: none"> <li>◦ IO2 on induction and deduction</li> <li>◦ the terms ontology, epistemology, theory (Babbie, SAGE Online Dictionary of Social Research Methods...)</li> </ul> </li> <li>• Depending on the number of students, (in the case of a 16 students-class) 4 readings (each of them can be 3-5 pages long) discussing the main theoretical units/part-topics (e. g. scientific theories, epistemological trends and their scientific history background), these are distributed to the 4 teams who read, discuss and present them. OR YouTube videos like <a href="https://www.youtube.com/watch?v=8xvpvBVCo0c">https://www.youtube.com/watch?v=8xvpvBVCo0c</a></li> <li>• The assignment of the groups: they present the results of their readings in the form of a <b>mindmap</b> (by the groups of students) by using Coggle (<a href="http://coggle.it/">http://coggle.it/</a>).</li> </ul>		35 mins

<ul style="list-style-type: none"> <li>Afterwards the class creates one mindmap with the direction of the teacher, based on the mindmaps created by the groups with the facilitation of the teacher.</li> </ul> <p><b>d) Activity providing insight into the RMA and researcher professions - (20 minutes)</b></p> <ul style="list-style-type: none"> <li>Introduction to the RMA carrier by inviting an RMA (<i>10 minutes of self-introduction + 10 minutes of Q&amp;A</i>)</li> <li><i>Questions of the teacher previously sent to the RMA as a guide for the presentation, for example</i> <ul style="list-style-type: none"> <li>Your education background. What kind of education is useful in the case of an RMA?</li> <li>How did you choose this profession?</li> <li>What are your duties?</li> <li>What are the most exciting or challenging parts of the profession? What do you love in your job?</li> <li>What are the trajectories of further development / career opportunities?</li> <li>What are the most important / useful skills for this profession?</li> </ul> </li> <li>optionally, this conversation can be done via Internet as well</li> </ul> <p><b>e) Quick end-of-lesson feedback for the teacher</b></p> <p>Competition by <a href="#">Socrative</a> or <a href="#">Wordwall</a> game with quiz questions related to the content of the lesson.</p>	20 mins  5 mins
--	-----------------------

## Lesson 2: Introduction to research design, research methods and research life cycle

Learning outcomes to be developed:

- The student can distinguish and describe the types and specificities (aims, advantages, limits, appropriateness to certain disciplines) of main research methods that can be applied by different scientific areas (e.g. observation, survey, interview, focus group, experiments, etc).
- The student should understand the research project lifecycle.
- The student can identify the differences between a research design/plan and a research proposal.
- The student can apply the stages of the research project lifecycle to a research plan, identifying the key questions to answer at each stage.
- The student is able to recognise and integrate the motivations, expectations and role of a researcher.
- The student is able to construct logical arguments to present a research idea.
- The student is committed to find a balance between assertiveness and cooperation in the course of teamwork in research as a leader and as team member.
- The student is open to perceive and accept the diversity of cultural and social context of research systems and practices.
- The student is open for different research methods and is committed to finding consensus in an interdisciplinary research setting.

○

Teaching ideas: Methods, tools, illustration, problem, game etc.	Evaluation and assessment	Timing
<b>a. Playful activity enhancing recalling prior knowledge: - 5 minutes</b> <b>Wordcloud:</b> “Answer the following question by typing single words at this link, indicating the following ID ( <a href="https://www.mentimeter.com/">https://www.mentimeter.com/</a> )” <i>Content of the questions will be related to the curriculum, e. g. What are the goals/main features/of research? What are the distinctive features of natural science/human and social research?etc.</i>		5 mins
<b>b. 10 minutes long frontal presentation by the teacher:</b>		10 mins

<ul style="list-style-type: none"> <li>goal: providing short summary of the first lesson, laying the foundations for research methods, brief explanation of theoretical framework</li> <li><b>c. Activities helping the understanding of theoretical knowledge-</b> 35 minutes             <ul style="list-style-type: none"> <li>Groups of 3 get the name of 1-1 concept, and different types of sources of information on scientific methods                 <ul style="list-style-type: none"> <li>youtube videos on the topic, e. g. in case of qualitative and quantitative research, an example can be <a href="https://www.youtube.com/watch?v=69qP8kFJp_k">https://www.youtube.com/watch?v=69qP8kFJp_k</a></li> <li>descriptive texts on the given concept e. g. <a href="https://methods.sagepub.com/base/download/BookChapter/social-research-methods/n2.xml">https://methods.sagepub.com/base/download/BookChapter/social-research-methods/n2.xml</a></li> <li>example for the use of the method (research)</li> <li>on the base of the sources, they prepare infographics on the concept (provide structure, arrange and demonstrate) <i>some examples will be inserted here for infographics Possible software (the teacher can choose according to his/her preference</i> (<a href="https://www.canva.com/create/infographics/">https://www.canva.com/create/infographics/</a>; <a href="https://piktochart.com/">https://piktochart.com/</a>; <a href="https://www.easel.ly/">https://www.easel.ly/</a>; <a href="https://www.visme.co/make-infographics/">https://www.visme.co/make-infographics/</a>, <a href="https://powerbi.microsoft.com/">https://powerbi.microsoft.com/</a>)</li> </ul> </li> <li>The teacher continues the compilation of the common mind map on the discussed topics (by using Coggle (<a href="http://coggle.it/">http://coggle.it/</a>) : the mind map summarizing the content of the 1st Lesson and compiled by the teacher in Lesson 1 will be further elaborated in the course of the whole Module.</li> </ul> </li> </ul>	<p>Peer grading (giving points to each other) as the group members work together. Providing the correct specificities of the research methods. Suggestion for grading: 10 points maximum for the infographic (the group members receive the same amount of points)</p> <p>-----</p>	<p>35 mins</p>
<p>2nd part of the lesson (<i>introduction to</i>): 20 minutes</p> <ul style="list-style-type: none"> <li><b>d. First steps of PBL encompassing Lessons #2-4:</b> discussing the main and the sub-topic of a research idea. Groups of 2 students can work together - a possible project can be that they are given one main problem, and 4 aspects (political, economic, legal and psychological), they give a report to the group and the entire picture can be achieved by that → mindmap on the whole topic</li> </ul> <p>Ideas for pre-defined real problems:</p>		<p>20 mins</p>

<ul style="list-style-type: none"> <li>• the impact of Covid-19 pandemic <ul style="list-style-type: none"> <li>○ economic challenges</li> <li>○ impact on education</li> <li>○ impact on health care system</li> <li>○ impact on labour market, jobs</li> <li>○ impact on consumption (webshops)</li> <li>○ impact on international trade relations</li> <li>○ impact on inter-state relations</li> <li>○ impact on EU (possible solutions, future of EU, budget)</li> <li>○ impact on the global powers (geopolitics)</li> <li>○ legal aspects (restrictive measures, governance)</li> </ul> </li> <li>• climate change <ul style="list-style-type: none"> <li>○ economic challenges</li> <li>○ energy market, energy policy</li> <li>○ social impact</li> <li>○ impact on health care</li> <li>○ EU - policies, priorities, initiatives</li> <li>○ agriculture</li> <li>○ innovation</li> <li>○ green deal - political sphere</li> <li>○ migration policy</li> <li>○ automobile industry</li> </ul> </li> <li>• aging society <ul style="list-style-type: none"> <li>○ impact on the economy</li> <li>○ health care / social security system</li> <li>○ society (generations)</li> <li>○ labour market</li> </ul> </li> <li>• migration <ul style="list-style-type: none"> <li>○ health care / social security system</li> <li>○ labour market</li> <li>○ EU level: policies, politics, member states - political parties</li> <li>○ education</li> </ul> </li> <li>• artificial intelligence <ul style="list-style-type: none"> <li>○ labour market</li> <li>○ ethical issues</li> <li>○ legal questions</li> </ul> </li> </ul>		
---	--	--

<ul style="list-style-type: none"> <li>○ economy</li> <li>○ innovation</li> </ul> <ul style="list-style-type: none"> <li>• From pre-defined real problems (for example ageing research community, one of the consequence of which is that the emphasis in (financial) management is shifted; generational tensions; coronavirus and digital revolution - new solutions in the workplace, social relations, entertainment, the rearrangement of the education); the class can choose one main topic <ul style="list-style-type: none"> <li>○ within which teams of 2 will define research narrower sub-topics (such as financial, environmental, psychological etc. consequences)</li> <li>○ Homework: start a literature review and reference collection</li> </ul> </li> </ul> <p>e. Introduction of the RESEARCH PLAN TEMPLATE cby the teacher on the base of which will develop their plans</p> <p><i>A research plan template will be provided in the annex</i></p> <p>f. <b>Quick end-of-lesson feedback for the teacher - 5 minutes</b></p> <p>In case of the different approaches (hermeneutical vs scientific, inductive vs. deductive, qualitative vs. quantitative approach) wordcloud (<a href="https://wordart.com/">https://wordart.com/</a> , <a href="http://www.wordle.net">http://www.wordle.net</a>; <a href="https://www.mentimeter.com/">https://www.mentimeter.com/</a>) can be applied to see if the major elements of the approaches are understood (by using mentimeter for example).</p>		5 mins

## Lesson 3: Research integrity and ethical conduct

Learning outcomes to be developed:

- The student should understand the research project lifecycle and the role of RMAs within it.
- The students can discuss, formulate arguments and critically examine their beliefs in the context of real cases of scientific integrity, responsible research, ethical dilemmas that can emerge in the course of a research work project.
- The student is open to perceive and accept the diversity of cultural and social context of research systems and practices.

Teaching ideas: Methods, tools, illustration, problem, game etc.	Evaluation and assessment	Timing
<p>a. <b>Playful activity enhancing recalling prior knowledge: - 5 minutes</b>  <b>Kahoot:</b> multiple-choice or true-or-false questions  <i>Content of the questions will be related to the curriculum, e. g. What are the characteristics of a given research method? etc.</i></p>	<p><i>Results (scores) should be counted into the end of semester grade</i></p>	<p><b>5 mins</b></p>
<p><b>b) Presentation of a real and famous research ethics dilemma (5 mins) &amp; some basic rules of the dispute</b> (Milgram, Philip Zimbardo, Laud Humphrey: description of the cases: Babbie, E (2010). <i>The practice of social research</i>. Wadsworth Cengage Learning. pp. 3-10. ISBN-13: 978-0-495-59841-1 <a href="http://ccftp.scu.edu.cn/Download/e6e50387-38f2-4309-af84-f4ceeefa5baa.pdf">http://ccftp.scu.edu.cn/Download/e6e50387-38f2-4309-af84-f4ceeefa5baa.pdf</a>)</p> <ul style="list-style-type: none"> <li>• group formation on the base of individual opinions, and collecting arguments (5 mins)</li> <li>• group level <b>debate</b> when the group is represented by one of the members, in rotation (10 mins) Methodological guide for the teacher on how to manage a debate in the class: <a href="https://www.teachhub.com/classroom-">https://www.teachhub.com/classroom-</a></li> </ul>		<p><b>25 mins</b></p>

- <https://www.unodc.org/e4j/en/integrity-ethics/module-14/exercises/a-case-studies.html>

## Lesson 4: RMAs as Professionals at the Interface of Science

Learning outcomes to be developed:

- The student should understand the research project lifecycle and the role of RMAs within the research cycle.
- The student is able to recognise and integrate the motivations, expectations and role of a researcher, and of other professions linked to the research activity.
- The student can predict the needs for research interface activities along the research project lifecycle and identify key RMA roles (e.g. Funding Advisory, Project Manager, Science Communicator).
- The student is committed to find a balance between assertiveness and cooperation in the course of teamwork in research as a leader and as team member.

Teaching ideas: Methods, tools, illustration, problem, game etc.	Evaluation and assessment	Timing
<b>a) Conversion enhancing recalling the experiences of the first lesson</b> <ul style="list-style-type: none"> <li>• What do we know about the RMA profession?</li> <li>• Listening to the interview, what were your impressions, what are the things that the expert enjoys in his work?</li> <li>• What were his challenges?</li> </ul>		5 mins
<b>b) Teacher's presentation</b> on the development of RMA profession, on the base of Lesson 4 and the study of <a href="#">Kerridge and Scott (2018)</a> or, using questions activating students' prior knowledge and ideas: <ul style="list-style-type: none"> <li>• What can be the factors in the last two decades that increase the need for their involvement in research?</li> <li>• What kind of challenges do RMAs might face?</li> <li>• What can be the levels of RMA profession?</li> <li>• What do you think, which are the countries where the profession has been known and accepted? What can be the reasons?</li> </ul>		10 min
<b>c) Class activity - the roles and tasks of RMAs</b>		10 mins

<p>Students find the place of the different roles and tasks of RMAs in the different project lifecycle stages.</p> <ul style="list-style-type: none"> <li>• Every student gets a piece of paper with one of the roles/tasks listed in Annex 4/A</li> <li>• There is a half-empty table on the board (using the <a href="#">BESTPRAC RSS Framework</a> , See Annex 4/A</li> <li>• Students stick their piece of paper to the relevant cell of the table</li> <li>• Feedback from the teacher</li> </ul> <p>(Alternatively, it can be accomplished by using a whiteboard, or a drag and drop exercise can be created in Moodle applying HSP activity.)</p>		5 mins
<p><b>d) Introducing the genre of “elevator pitch”</b></p> <p>Collecting answers</p> <ul style="list-style-type: none"> <li>- what makes a presentation effective, enjoyable? Good practices and pitfalls (the visual appearance of the ppt, presentation mode (body language, tone, eye contact), the structure of the content, etc.)</li> <li>- Oral and written completion and summary by the teacher: general guidelines for presentations</li> </ul>		5 min
<p><b>e) Watching 3-4 elevator pitches (videos)</b></p> <ul style="list-style-type: none"> <li>• What can be the purpose of such speeches?</li> <li>• What can be the situations where they are applied?</li> <li>• What are the differences between an elevator pitch and a presentation?</li> <li>• Wrap-up by the teacher: completion of the answers, general guidelines for presentations</li> </ul> <p>Sources, templates, infographics for the elevator pitch are in Annex 4/B</p>		15 min
<p><b>f) PBL situational game</b></p> <p>Work in pairs - practicing elevator pitch.</p> <p>Students can use the sources used in Lesson 4 and the information gained in the classroom work</p> <p>Situation: The student is a leading researcher who recognizes that their institution should open an RMA position and he has to convince the management of his university about the necessity and the importance of this investment.</p>		20 mins

<ul style="list-style-type: none"> <li>• compile an outline for an elevator pitch</li> <li>• perform it to each other</li> <li>• students record each other's speech by the camera of their cellphone and upload to Moodle for the teacher. (In this case, teacher needs a written permission from students for the use of the material within the class work.)</li> <li>• 2 volunteering students show their video to the class;</li> <li>• they give feedback to each other (template for evaluation is being elaborated, see the Annex 1)</li> <li>• short feedback and evaluation by the teacher</li> </ul> <p><b>PBL task:</b> the groups finalize their research plan:</p> <ul style="list-style-type: none"> <li>• conclusions of the literature review,</li> <li>• selecting research questions</li> <li>• selecting research methods</li> <li>• setting goals and a timetable</li> </ul> <p><b>Homework:</b></p> <ul style="list-style-type: none"> <li>• Preparation for the individual elevator pitches. The team members have to cooperate regarding the contents . Way of sharing the work among the pairs of students:</li> <li>• in each pair, student "A" reports on the             <ul style="list-style-type: none"> <li>▪ background,</li> <li>▪ public benefits</li> <li>▪ the conclusions of the literature published so far regarding the planned research plactivity</li> <li>▪ research question</li> </ul> </li> <li>• student "B" reports on the             <ul style="list-style-type: none"> <li>▪ hypothesis</li> <li>▪ methods to apply with explanation and supporting arguments</li> <li>▪ planned dissemination activities</li> </ul> </li> </ul> <p>Optional task for extra points: the pairs prepare infographics for their projects</p> <p>Optional/Alternative homework</p>		20 mins
--	--	---------

<p>Let's imagine that each group of students is a team within an institution, who recognize that their institution should open an RMA position. The task of the group is to compile a job announcement. Background material to be used for the task: <a href="#">ARMA's Professional Development Framework for Research Managers and Administrators</a>, p. 4-8</p> <ul style="list-style-type: none"> <li>○ For this, they have to assemble the competences/tasks of an RMA (educational background, competences, skills, knowledge).</li> <li>○ Students read and use the text of Lesson 4 for this task</li> <li>○ After the groups upload the result of their work, the teacher projects them, and the groups evaluate/compare each others' announcements</li> <li>○ the teacher summarizes and completes them by referring to the results of the previous research.</li> </ul>		
---	--	--

### Sources for the teacher that can be optionally used in the classwork as well

Guides & examples on the method of elevator pitch:

### Annex 4/A

List of tasks to be distributed for students

#### - Identifying funding opportunities (finding)

- Disseminating funding
- Advising
- Training
- Gathering non-public information
- Quantitative and qualitative analysis of EU funding and organisational participation

#### - Providing general information and support regarding proposal submission

- Facilitating and setting up of internal approval and signature process
- Providing budget notes and explaining + enforcing internal budget rules
- Advise on the execution of the writing process and consortium formation and management
- Advise on the content to be written (vs writing process)

- General advising on legal aspects and providing organisational legal documents
- Linking to information or advising on IP, ethics, open access and open data
- Statistics and analysis
- Facilitating the signature of the grant agreement
- Facilitating the internal setup of the project
- Internal and external communication strategies
- Reviewing and discussing the GA and the grant preparation with the PI
- Facilitating the consortium agreement and handling related issues
- Communicating project success (internal and external)- Supporting financial and technical reporting
- Consortium management
- Communicating internal procedures
- Functioning as a helpdesk and providing administrative support
- Contracts management and archiving
- Support for amendments of the Grant Agreement and Consortium Agreement

Half-empty table to draw on the board

Research lifecycle stage	RMA tasks and roles
Before the proposal	

<b>Proposal</b>	
<b>Grant preparation</b>	
<b>Project</b>	

#### Annex 4/B

Elevator pitch:

- <https://www.valuer.ai/blog/why-your-elevator-pitch-sucks>

## Lesson 5: Present and discuss a research plan

Learning outcomes to be developed:

- The student can apply the stages of the research project life cycle to a research plan, identifying the key questions to answer at each stage.
- The student can predict the needs for research interface activities along the research project lifecycle and identify key RMA roles (e.g. Funding Advisory, Project Manager, Science Communicator).
- The student is committed to find a balance between assertiveness and cooperation in the course of teamwork in research as a leader and as team member.

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Evaluation and assessment</b>	<b>Timing</b>
<p>Reporting on research plans:</p> <ul style="list-style-type: none"> <li>• Pairs of students present their research plan in the frame of an international webinar</li> <li>• Every student holds a presentation using the tool of “elevator pitch” and infographics to present the results of their work.</li> <li>• Way of sharing the work among the pairs of students: in each pair, student “A” reports on the <ul style="list-style-type: none"> <li>▪ background,</li> <li>▪ public benefits</li> <li>▪ the conclusions of the literature published so far regarding the planned research plactivity</li> <li>▪ research question</li> </ul> </li> <li>○ student “B” reports on the <ul style="list-style-type: none"> <li>▪ hypothesis</li> <li>▪ methods to apply with explanation and supporting arguments</li> <li>▪ planned dissemination activities</li> </ul> </li> </ul> <p><b>Homework:</b> submission of the final versions of the research plans, corrected and completed according the feedback received on the lesson</p>	<p>Combination of peer-, self- and teacher evaluation based on predefined categories. Evaluation of the homework is carried out by the teacher.</p> <p><i>Template with questions in the annex is being elaborated.</i></p>	

### Sources for the teacher

Thody Angela (2006): *Writing and Presenting Research*

<http://elearn.luanar.ac.mw/odl/public/Files/Angela%20Thody's%20Writing%20and%20Presenting%20Research.pdf>

### Annex 1 to Lesson 5

Evaluation criteria for the elevator pitch

	Pair 1		Pair 2		Pair 3		Pair 4		Pair 5		...	
Clarity, good comprehensibility: 1: [defined features of the given level] 2:.... 3: 4: 5:												
Level of contact with the audience The student could keep eye contact with the group												
Structure of presentation												
Content												
Length of presentation												

## Module 2 - Research Funding, Policy and Governance

### Lesson 1 Policy drivers, research agendas, european research policy

Learning outcomes to be developed:

- The student can identify major policy drivers (e.g. UN developmental goals, cross-cutting issues) and assess their influence in shaping research agendas.
- The student can identify examples of societal and economic drivers impacting and defining research policy (e.g. the COVID 19 situation).
- The student can differentiate between policy and strategy and identify suitable examples in the context of research institutions and processes.
- The student can discuss and formulate arguments and confront opinions in the context of real cases of scientific policies
- The student demonstrates curiosity and interest for systemic approaches and for the organization of the research ecosystem.
- The student is able to accept others' views, and work together to provide the necessary support for the proposal's preparation.
- The student is critical regarding his own work and that of others taking on a constructive attitude.
- The student takes responsibility for its own work.

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Methods for evaluation and assessment</b>	<b>Timing</b>
<b>a) Evaluation of prior knowledge and competences - 10 minutes</b> Answers to basic questions, e. g. for evaluating the understanding of the main issues of Lesson 1 of Module 1 (students have to read it in advance, at home) Applications to use: <ul style="list-style-type: none"> <li>• Kahoot test (after registering, at <a href="https://kahoot.com/">Kahoot</a> homepage, you can create easily games helping assessment <a href="#">here</a>)</li> <li>• or interactive word cloud (<a href="https://www.mentimeter.com/">https://www.mentimeter.com/</a>)</li> <li>• OR or virtual whiteboard (linoit.com for example)</li> </ul>		<b>10 mins</b>

<p><b>b ) Frontal presentation by the teacher (15 mins):</b> goal: providing a framework for the lesson (general information about the policy drivers, european research policy for example), also laying down the foundations regarding the definition and characteristic features of the concepts policy and strategy</p>		15 mins
<p><b>Activities helping the understanding of theoretical foundations</b> <b>c) Brainstorming</b> on external and internal drivers of research policy (virtual whiteboard (i.e. linoit) could be a platform for brainstorming; word cloud (i.e. mentimeter) can also be applied) (5 min) + short summary of the lecturer (of the external and internal drivers) (5 mins)</p>		10 mins
<p><b>d) think-pair-share (or write-pair-share)</b> using the “A renewed European Agenda for Research and Innovation - Europe's chance to shape its future” excerpt from the EC’s document. The students get a short list of questions, which they think of while reading the excerpt (3 mins), then form pairs and answer the question(s) (5 mins). Afterwards they share their ideas in class (5 mins). A template can be created before the class including the question, place of the individual answers, then answer of the group, and also leaving space for those elements that the group did not include. (appr. 15 mins) + short summary of the lecturer (of the external and internal drivers) (5 mins)</p>		35 mins
<p><b>or</b> students work in pairs: based on the given dates of the source indicated, the students collect the contemporary trends, policy drivers. (Collect minimum 5 (?) (10 mins)+ short summary of the lecturer (of the external and internal drivers) (5 mins)</p>		or 20 mins
<p><b>e) Snowballing:</b> starting with groups of two - one pair discuss either policy or strategy (characteristics) - based on the reading assigned, then they form groups of four (one 2-member group was discussing policy, the other strategy), they “teach” each other of the characteristic features, and list those. The class discusses the findings together, then the groups receive examples of documents on research and innovation in Europe, and they assign them to either categories. (cca. 25 mins)+ short summary of the lecturer (of the external and internal drivers) (5 mins) <i>A clear definition of the two concepts, listing a series of definition elements, would be useful; there could also be examples that could be put</i></p>		30 mins

## Lesson 2: the Funding research framework: funding programmes and calls

Learning outcomes to be developed:

- The student can understand and contextualise European research funding frameworks and main European funding programmes and schemes to support research and innovation activities (e.g. Horizon Europe).
- The student can analyse a given European call for funding from the perspective of its underlying policy (need for the call) and proposal (goals, activities, and expected outcomes and impact).
- The student can distinguish and discuss at which stage of policy and strategy development intervene pre-award and research policy/strategy related professions.
- The student demonstrates curiosity and interest for systemic approaches and for the organization of the research ecosystem.
- The student is able to accept others' views, and work together to provide the necessary support for the proposal's preparation.
- The student is critical regarding his own work and that of others taking on a constructive attitude.
- The student takes responsibility for its own work.

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Methods for evaluation and assessment</b>	<b>Timing</b>
--	--	---------------

<p><b>a. Short revision of the main points of the first lesson (5 mins):</b></p> <ul style="list-style-type: none"> <li>Kahoot test (after registering, at <a href="#">Kahoot</a> homepage, you can create easily games helping assessment <a href="#">here</a>)</li> <li>OR virtual whiteboard (linoit.com for example)</li> </ul>	<p><i>Results (scores) should be counted into the end of semester grade</i></p>	<p><b>5 mins</b></p>
<p><b>b) Frontal presentation by the teacher (20-25 mins):</b></p> <p>The goal of the presentation is to give an insight to the context of EU funding schemes, and on the general characteristic features of calls.</p>		<p><b>25 mins</b></p>
<p><b>c) Short analysis of a typical funding call for proposal (15 mins)</b></p> <ul style="list-style-type: none"> <li><b>short presentation</b> helping students to show them which are the most important parts, details of the rather long texts (see table in text). How to find the most important parts of them - it will help them to be able to find the most relevant bits of information. Specific question can give help for the students to accomplish the task.</li> <li><b>Idea for gamification:</b> <a href="#">Quiz competition with Mentimeter</a> Questions are taken in the frame of a competition and a ranking can be seen immediately according to the right answers (e. g. What is the deadline for submission? Maximum amount of the grant? Can any equipment be procured? How long is the project period? etc.) -</li> <li><b>Peer learning:</b> Quickest respondents can share their methods with the class.</li> </ul> <p><i>Call for proposal has to be chosen in advance</i></p>		<p><b>15 mins</b></p>
<p><b>d) In-depth analysis of calls for proposal in individual and group work (25 mins):</b></p> <ul style="list-style-type: none"> <li>The teacher selects and distributes among students the documentation of 4 types of call (Erasmus+, Horizon 2020, Twinning, Marie Skłodowska-Curie, Interreg).</li> <li>Each student receives one documentation and works on it individually, by filling in a table based on the <a href="#">logical framework matrix</a>,</li> </ul>		<p><b>25 mins</b></p>

Goals, invested resources and activities					Intended results		
Goal s	Assumptio ns, risks	Resource s, inputs	Activitie s		Outpu ts	Outcom es	Impa ct

- then comparing and answering questions on the conclusions in small groups:
  - What can be the risky elements of the future projects based on this call?
  - In case you were the manager of a project supported by this call, which 5 key “result” elements would you select as the most important ones that you would pay special attention?

**e) PBL - Activities developing students’ skills (10-15 mins)**

Forming groups of 4 from, out of the groups of 2 formed in the course of Module 1, according to the similarities of their research project ideas.

Tasks for this lesson

- discussing and setting the common research questions that can be interesting for the group members aims, goals for an ideal research project
- browsing databases and searching at least 2-3 calls for tender which can be suitable for the realization of some of their main research aims. The Funding and Tenders portal is introduced by the teacher briefly.
-

**f) Quick end-of-lesson feedback for the teacher - 5 minutes**

Competition by Socrative or Wordwall game with quiz questions related to the content of the lesson.

*Results (scores) should not be counted into*

<p><b>Homework for the teams:</b></p> <ul style="list-style-type: none"> <li>• identify 2-3 calls that can be suitable for the research aim of the group. Students should be encouraged to select such calls where international consortium is required and they should select from different funding programmes and instruments to see the diversity</li> <li>• Write a sentence why the specific call would be suitable for the research topic of the group</li> </ul> <p>(Teacher's homework: take a look at the calls and reasonings of students before the next lesson, and prepare feedback on them (before the lesson), also can choose the most appropriate one.)</p>	<p><i>the end of semester grade</i></p>	
---	---	--

## Lesson 3 Funding proposals and evaluation criteria

Learning outcomes to be developed:

- The student can identify examples of societal and economic drivers impacting and defining research policy (e.g. the COVID 19 situation).
- The student can understand and contextualize European research funding frameworks and main European funding programmes and schemes to support research and innovation activities (e.g. Horizon Europe).
- The student is familiar with the general process and principles of evaluation and assessment criteria of research proposals: what do funding agencies prefer, what they dislike, vocabulary required, how to interpret what is required in a specific call, aspects meaning advantage in the context of EU funded calls
- The student is able to recognize the main components of a funding proposal and link them to the evaluation criteria of a given call for funding.
- The student can explain the pre-award work and how it fits into the research cycle.
- The student is able to accept others' views, and work together to provide the necessary support for the proposal's preparation.
- The student is critical regarding his own work and that of others taking on a constructive attitude.
- The student takes responsibility for its own work.

Teaching ideas: Methods, tools, illustration, problem, game etc.	Methods for evaluation and assessment	Timing
<b>a) Short revision of the main points of the previous lesson (5 mins):</b> <ul style="list-style-type: none"> <li>• Kahoot test (after registering, at <a href="#">Kahoot</a> homepage, you can create easily games helping assessment <a href="#">here</a>)</li> <li>• OR virtual whiteboard (linoit.com for example)</li> </ul>	<i>Results (scores) should be counted into the end of semester grade</i>	<b>5 mins</b>
<b>b) Frontal presentation by the teacher (20-25 mins):</b> The goal of the presentation is to provide the essential information regarding the structure of the calls, pointing out the main parts of them. The evaluation of the funding proposals is also relevant to introduce. The		<b>25 mins</b>

<p>evaluation criteria based on the 2018-2020 self-evaluation form are the following: excellence, impact, quality and efficiency of the implementation.</p> <p>The scoring is also included in the following document (as is indicated in the text as well:</p> <p><a href="https://ec.europa.eu/research/participants/data/ref/h2020/call_ptef/ef/2018-2020/h2020-call-ef-ria-ia-csa-2018-20_en.pdf">https://ec.europa.eu/research/participants/data/ref/h2020/call_ptef/ef/2018-2020/h2020-call-ef-ria-ia-csa-2018-20_en.pdf</a>)</p>		
<p><b>c) Work in groups of three (35 mins):</b> Part B of selected funding proposals is given to the groups. The groups has to find the answers to the questions (pg. 28). (15 mins) The members share their findings (8 mins), then they answer the questions in the class (12 mins) - the teacher asks one question from one group, but the member answering it should not be the same who worked on the question.</p>		35 mins
<p><b>d) Short feedback (10 mins)</b> on the homework (the students choose the proper call for application with the help of the teacher) and provide the tasks of the <b>next (individual) homework (5 mins)</b>, which is:</p> <ul style="list-style-type: none"> <li>identifying potential partner institutions (with the availabilities of the given institution) with a detailed justification explaining the reasons of the involvement of the given partner (max 4 partners)</li> <li>compiling a letter of invitation / expression of interest to the project.</li> <li>start filling out the logframe for the project applying the logframe matrix provided in lesson 2.</li> </ul>		15 mins
<p>Teacher's short presentation on: "project concept" and "expression of interest": features, function.</p> <p>Homework should be uploaded to the given platform prior to the class.</p> <p>Teacher's homework: prepare for providing feedback on the uploaded materials, especially the letter of invitation for next class.</p>		
<p><b>e) Quick end-of-lesson round-table feedback for the teacher - 5 minutes</b></p> <p>Which were the most interesting issues you learnt at this lesson?</p>		5 mins

## Lesson 4 Preparation of a project proposal

Learning outcomes to be developed:

- The student is familiar with the general process and principles of evaluation and assessment criteria of research proposals: what do funding agencies prefer, what they dislike, vocabulary required, how to interpret what is required in a specific call, aspects meaning advantage in the context of EU funded calls
- The student can analyse a given European call for funding from the perspective of its underlying policy (need for the call) and proposal (goals, activities, and expected outcomes and impact).
- With the help of the teacher, the student can draft a simple budget for a proposal, according to the activities planned for the different project phases and milestones.
- The student is able to accept others' views, and work together to provide the necessary support for the proposal's preparation.
- The student is critical regarding his own work and that of others taking on a constructive attitude.
- The student takes responsibility for its own work.

Teaching ideas: Methods, tools, illustration, problem, game etc.	Methods for evaluation and assessment	Timing
<b>a) Short revision of the main points of the previous lesson (5 mins):</b> revision of the main points.		5 mins
<b>b) Visiting an online brokerage event (30 minutes)</b> <ul style="list-style-type: none"> <li>• Teachers' brief introduction of this type of event, presentation of the functions provided by the concrete online interface to be visited</li> <li>• Guiding questions for the observation: "What are the similarities and differences between this event and the online database browsing? What added value of a brokerage event can you identify?"</li> </ul>	b) Guiding questions for the observation: "What are the similarities and differences	30 mins

<ul style="list-style-type: none"> <li>• Signing in (with the teachers login) the event, collecting observations</li> <li>• Discussing the conclusions</li> </ul> <p><b>b) Frontal presentation by the teacher (20 mins):</b> The goal of the presentation is to provide the essential information regarding the formulation of work packages (how to formulate them; good and bad examples). The other part of the presentation touches upon the financial provisions: major cost categories, their basic characteristics, etc.</p> <p><b>c) PBL - Activities developing students' skills (40 mins):</b></p> <ul style="list-style-type: none"> <li>• For this lesson, the students identify maximum 4 potential project partner institutions, provide the availabilities of the institutions and also explain the reasons why to involve that partner. In class, the final common <b>decision on the partners</b> in the frame of a negotiation process takes place (10 mins)</li> <li>• Introduction of the previous research conducted, developments of the research focus, research questions, brief rationale for the project idea (5 mins)</li> <li>• setting project <b>work plan</b>, and activities based on them (10 mins)</li> </ul> <p>The activity will focus on how the work plan is built</p> <ul style="list-style-type: none"> <li>• Work Packages,</li> <li>• tasks / activities;</li> <li>• deliverables / outputs, etc.</li> <li>• What roles partners can be dedicated, how you plan the activities (running in parallel or built on each other, etc.)</li> </ul> <p>- drafting &amp; negotiating on a simple <b>budget</b> (15 mins)</p> <p><b>Homework:</b></p> <ul style="list-style-type: none"> <li>• finish the budget, phases and activities.</li> </ul>	<p>between this event and the online database browsing? What added value of a brokerage event can you identify?" -</p> <p>students take individual notes on virtual whiteboard (save them individually)</p>	<p>20 mins</p> <p>40 mins</p>
---	---	-------------------------------

## Lesson 5 Institutional proposals, research strategy and governance

Learning outcomes to be developed:

- The student can differentiate external from internal drivers of research policy.
- The student is able to recognize the main components of a funding proposal and link them to the evaluation criteria of a given call for funding.
- The student can explain the main governance structure of a given research institution.
- The student can distinguish and discuss at which stage of policy and strategy development intervene pre-award and research policy/strategy related professions.
- The learner interiorizes and commits to the values and the mission of the institution.
- The student demonstrates curiosity and interest for systemic approaches and for the organization of the research ecosystem.
- The student is able to accept others' views, and work together to provide the necessary support for the proposal's preparation.
- The student is critical regarding his own work and that of others taking on a constructive attitude.
- The student takes responsibility for its own work.

Teaching ideas: Methods, tools, illustration, problem, game etc.	Methods for evaluation and assessment	Timing
<b>a. Short revision of the main points of the previous lesson (5 mins):</b> Kahoot test (after registering, at <a href="#">Kahoot</a> homepage, you can create easily games helping assessment <a href="#">here</a> OR virtual whiteboard (linoit.com for example)	<i>Results (scores) should be counted into the end of semester grade</i>	<b>5 mins</b>
<b>b) Brainstorming:</b> what kind of research performing institutions are there according to the students?		<b>10 mins</b>

<p>The teacher can apply virtual whiteboard (i.e. linoit) as a platform for brainstorming; word cloud (i.e. mentimeter) can also be applied (5 min) + short summary of the lecturer on the results (5 mins)</p>		
<p><b>b) Frontal presentation by the teacher (20-25 mins):</b> The goal of the presentation covers information regarding the research institutions, their general description. Quality assessment can also be mentioned. The general introduction of the institutional proposal is covered.</p>		25 mins
<p><b>c) Groups of 3 students</b> can work on the followings: first, students divide the tasks among each other, and gather the necessary information <b>(15 mins)</b></p> <ul style="list-style-type: none"> <li>• find the values and missions of the University - prepare a short list of them</li> <li>• what kinds of research projects are there at the University (list 5-10 of them)</li> <li>• when elaborating an institutional proposal, on what areas RMA support can be detected?</li> </ul>		20 mins
<p>Students dealing with the same question come together, see what they found. Those working on question 3 prepare a mindmap together. They discuss the results in class. <b>(15 mins)</b></p>		15 mins
<p><b>d) Homework (10 mins):</b> Short feedback on homework. Continuing the elaboration of the call for tender (according to the guidance of the teacher)</p>		10 mins
<p><b>e) Quick end-of-lesson round-table feedback for the teacher - 5 minutes</b> Which were the most interesting issues you learnt at this lesson?</p>		5 mins

## Lesson 6 Conflict of interests between policy, funding and research

Learning outcomes to be developed:

- The student can identify examples of societal and economic drivers impacting and defining research policy (e.g. the COVID 19 situation).
- The student can understand and contextualise European research funding frameworks and main European funding programmes and schemes to support research and innovation activities (e.g. Horizon Europe).
- The student can discuss and formulate arguments and confront opinions in the context of real cases of scientific policies.
- The student can effectively communicate, negotiate terms and persuade different target audiences including policy makers for programme bodies, senior management of research institutions, research managers, and researchers.
- The learner interiorizes and commits to the values and the mission of the institution.
- The student demonstrates curiosity and interest for systemic approaches and for the organization of the research ecosystem.
- The student is able to accept others' views, and work together to provide the necessary support for the proposal's preparation.
- The student is critical regarding his own work and that of others taking on a constructive attitude.
- The student takes responsibility for its own work.

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Methods for evaluation and assessment</b>	<b>Timing</b>
a. <b>Short revision of the main points of the previous lesson (5 mins):</b> Kahoot test (after registering, at <a href="https://kahoot.com">Kahoot</a> homepage, you can create easily games helping assessment <a href="#">here</a> ) OR virtual whiteboard (linoit.com for example)	<i>Results (scores) should be counted into the end of semester grade</i>	<b>5 mins</b>

<b>b) PBL progress (25 mins):</b> - The groups finish elaborating the call for tender.		<b>15 mins</b>
<b>c) Work in pairs:</b> each pair receives one of the articles (in case of 4 pairs, 2 will receive the first and 2 the second article). The pair of students answer the following questions based on the articles (15 mins): <ol style="list-style-type: none"> <li>1. Which funding changes have occurred in the last decades?</li> <li>2. What other factors have changed in the last decades that seem to affect the way research is conducted?</li> <li>3. What are the micromechanisms by which researchers adapt to the current pressures of the research environment?</li> <li>4. Which behaviours related to the way researchers conduct their research have been observed?</li> <li>5. Which ethical dilemmas are raised in the articles?</li> <li>6. If you were a Researcher/Funding Agency/Policy maker/ RMA, you abide by which values? Consider the values of the citizen, the researcher and those of the institution.</li> <li>7. What course of action would you consider for the future?</li> </ol> Then, the groups working on the same article form a larger group, discuss their findings (10 mins) then the answers are discussed in class (20 mins).		<b>45 mins</b>
<b>Homework (10 mins):</b> <ul style="list-style-type: none"> <li>• The groups have to prepare a presentation for the last lesson – aim is to introduce the project, and convince the potential stakeholders / institutional decision makers.</li> <li>• studying the application of another group</li> <li>• taking notes individually for the evaluation on the base of pre-defined evaluation criteria</li> </ul>		<b>10 mins</b>
<b>d) Quick end-of-lesson round-table feedback for the teacher - 5 minutes</b> Which were the most interesting issues you learnt at this lesson?		<b>5 mins</b>

## Lesson 7 Oral presentations

Learning outcomes to be developed:

- The student can understand and contextualise European research funding frameworks and main European funding programmes and schemes to support research and innovation activities (e.g. Horizon Europe).
- The student is familiar with the general process and principles of evaluation and assessment criteria of research proposals: what do funding agencies prefer, what they dislike, vocabulary required, how to interpret what is required in a specific call, aspects meaning advantage in the context of EU funded calls
- The student can analyse a given European call for funding from the perspective of its underlying policy (need for the call) and proposal (goals, activities, and expected outcomes and impact).
- The student is able to recognize the main components of a funding proposal and link them to the evaluation criteria of a given call for funding.
- The student is able to draft a funding plan (a) in line with the institutional strategy of the organisation (b) that addresses external and internal drivers of policy and strategy, c) adjusted with the specific evaluation and assessment criteria, preferences of research calls (of the funding organisations).
- The student can discuss and formulate arguments and confront opinions in the context of real cases of scientific policies.
- The student can effectively communicate, negotiate terms and persuade different target audiences including policy makers for programme bodies, senior management of research institutions, research managers, and researchers.
- The student is able to accept others' views, and work together to provide the necessary support for the proposal's preparation.
- The student is critical regarding his own work and that of others taking on a constructive attitude.
- The student takes responsibility for its own work.
- The student takes responsibility for its own work.

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Methods for evaluation</b>	<b>Timing</b>
--	-------------------------------	---------------

a) Self-introduction and interview with a professional, **external evaluator of proposals.**

**b) Peer evaluation of the project proposals**  
- each group receives one of the proposals, and evaluate it (discussion of scoring),  
- give arguments and explanations for the evaluation in the form of an oral evaluation report.

### c) Feedback and tips from the professional evaluator

## Module 3 - Project Integration and Management

### Lesson 1: Project Lifecycle & RMAs as Professionals in the Project lifecycle

Learning outcomes to be developed:

- The student knows how to identify the activities in the light of the project objectives, outputs, main tasks, performance criteria and resource requirements set in the proposal.
- The student will identify the RMA professional roles involved directly and indirectly in post award project management

Teaching ideas: Methods, tools, illustration, problem, game etc.	Evaluation and assessment	Timing
<p><b>a) Games helping students to be connected:</b> getting acquainted with each other (10-15 minutes) <i>15 minutes</i></p> <ul style="list-style-type: none"> <li>• “Show and tell” see <a href="#">here</a></li> <li>• OR: “Snowball fight”- see <a href="#">here</a>.</li> <li>• OR see further ideas <a href="#">here</a></li> </ul>		<b>15 mins</b>
<p><b>c) Evaluation of prior knowledge and competences - 10 minutes</b> Exploring the initial competences, knowledge of students: Answers to short, <b>basic questions</b> by either of the followings</p> <ul style="list-style-type: none"> <li>• Kahoot test (after registering, at <a href="#">Kahoot</a> homepage, you can create easily games helping assessment <a href="#">here</a></li> <li>• or interactive word cloud (<a href="https://www.mentimeter.com/">https://www.mentimeter.com/</a>)</li> <li>• OR virtual whiteboard (linoit.com for example)</li> </ul> <p>Closed by teacher’s feedback and oral summary</p>	<p><i>Results (scores) should <b>not</b> be counted into the end of semester grade</i></p>	<b>10 mins</b>
<p><b>b) Introduction to the RMA carrier by inviting an RMA</b></p> <ul style="list-style-type: none"> <li>• on the request of the teacher, the RMA to share experiences on the different leadership styles applied in the different stages of a</li> </ul>		<b>30 mins</b> <i>10 minutes of self-introduction</i>

<p>project life cycle and refers to the theoretical content discussed later on, in the lesson</p> <ul style="list-style-type: none"> <li>optionally, this conversation can be done via Internet as well</li> </ul> <p><u>Unit 2 of the lesson: Setting the goals and rules for the course, together with the students</u></p> <p><b>1. Introduction of the course</b> (expectations, planned activities, assessment methods) and the topic of the lesson by the teacher - <i>10 mins</i></p> <p><b>2. Activities helping the understanding of theoretical foundation</b> related to the leadership model set by Morgeson et al (2010)</p> <p><a href="https://msu.edu/~morgeson/morgeson_derue_karam_2010.pdf">https://msu.edu/~morgeson/morgeson_derue_karam_2010.pdf</a></p> <ul style="list-style-type: none"> <li><b>classroom group work:</b> <ul style="list-style-type: none"> <li><b>Each student</b> receives one of the functions listed in the article on a piece of paper (see in the curriculum)</li> </ul> </li> </ul> <p><b>Leadership functions during the transition phase:</b></p> <ol style="list-style-type: none"> <li>1. Compose the team – bringing together the best available people for the job, taking into account complementary competences and ability to work together for a common goal</li> <li>2. Define the mission – clarifying the team purpose</li> <li>3. Establish performance expectations and set team goals – goals which are appropriately challenging and motivating</li> <li>4. Structure and plan – dividing out tasks and responsibilities, scheduling and so on</li> <li>5. Train and develop team members – including through coaching by the leader</li> <li>6. Sense-making — defined as “identifying essential environmental events, interpreting these events given the team’s performance situation, and communicating this interpretation to the team”</li> <li>7. Providing feedback – both to individuals and to the team collectively</li> </ol> <p><b>Leadership functions during the action:</b></p>	<p>+ 20 minutes of Q&amp;A</p> <p><b>10 mins</b></p> <p><b>10 mins</b></p>
---	--

<p>8. Monitor the team – “examining the team’s processes, performance, and the external team context”</p> <p>9. Manage team boundaries – “representing the team’s interests to individuals and groups outside the team in order to protect the team from interference as well as persuading others to support them” and co-ordinating activities with other teams</p> <p>10. Challenge the team – its performance, assumptions and ways of working</p> <p>11. Perform team tasks – “participating in, intervening in, or otherwise performing some of the team’s task work”</p> <p>12. Solve problems – diagnosing and resolving issues that prevent performance</p> <p>13. Provide resources – for example, information, equipment, finance and people</p> <p>14. Encourage team self-management – empowerment, accountability and responsibility</p> <p>15. Support the team social climate – encouraging positive and supportive behaviours between team members</p> <ul style="list-style-type: none"> <li>○ On the whiteboard, the <b>two phases are indicated</b> and they are explained as well (either by arrows, or timeline)</li> <li>○ The task of the students is to <b>find the proper phase</b> for the function they receive first.</li> <li>○ When the two (7 and 8 members) groups of students are formed, then they have to <b>decide the right sequence</b> of the functions and put their paper to the board.</li> <li>○ The teacher takes a photo of the whiteboard with the two phases and 15 functions, and upload it to the site of the seminar.</li> </ul> <p><b>3. Activity transforming the theoretical knowledge into personal experience:</b></p> <p>The teacher presents the students the fact that the aim of this course will be to gain practical experiences in all possible ways on the theories/knowledge that they learn in this course. A possible way to introduce this:</p>		<p><b>15 mins</b></p>
---	--	-----------------------

<p><i>“The theories presented above will be applied for ourselves as a team, as this situation is very similar to a workplace. In this case all of you will have to test yourself as leaders (using the Storyline method) but me as a teacher will have the overall responsibility for the effectiveness of our team and your satisfaction and development as my team members. This is an excellent occasion to set our expectations and our resolutions/decisions in terms of this course.</i></p> <ul style="list-style-type: none"> <li>• <i>Your task is now to think about the function you received earlier and formulate a sentence answering the question:</i> <ul style="list-style-type: none"> <li>○ <i>Group A (Leadership functions during the transition phase): “Have you experienced “your” function in any form, during this lesson? (E. g.: setting goals: the teacher presented the goals of the course)</i></li> <li>○ <i>Group B (Leadership functions during the action): “What are your expectations towards me in terms of the function you received in the previous exercise?, how can I enhance your development on that area” (E. g.: “Provide resources”= I will give you the necessary information regarding good examples/literature/various types of information helping you to better understand the content of the lesson)</i></li> </ul> </li> <li>• <i>Conversation aiming at the definition of the rules for the course including both students’ and teacher’s obligations (in the form of a written document to be available on the common (Moodle?) interface of the course)</i></li> </ul>		
---	--	--

## Lesson 2: Project Management Structure (PMS), Grant Agreement (GA) and Consortium Agreement (CA)

Learning outcomes to be developed:

- The student will map the main internal and external actors' involvement across the project management stages and devise a strategy for their timely contribution for the implementation of the project (i.e. Stakeholder Management)
- The student can follow the development of several simultaneous management tasks (eg. team management, cost management) and prioritize the most relevant ones at different stages of project management

Teaching ideas: Methods, tools, illustration, problem, game etc.	Evaluation and assessment	Timing
<p><b>a) Introduction of the lesson by the teacher</b> - main aims, topics (project life cycle, possible roles - see figure 3; grant and consortium agreement, etc.)</p> <p><b>b) New content with “expert jigsaw” method</b> describing the main parts of the Project Management Plan (PMP)</p> <ul style="list-style-type: none"> <li>• students form groups of 5</li> <li>• each student of the jigsaw groups get and study a different 1-2 pages long document including               <ol style="list-style-type: none"> <li>1. a sample plan such as: scope management plan;                   <ul style="list-style-type: none"> <li>▪ requirements management plan;</li> <li>▪ schedule management plan;</li> <li>▪ resources management plan;</li> <li>▪ costs management plan;</li> <li>▪ communication management plan;</li> <li>▪ quality management plan;</li> <li>▪ risk management plan;</li> <li>▪ procurement management plan;</li> <li>▪ stakeholder management plan.</li> </ul> </li> </ol> </li> </ul> <p>b. the description of the given plan, or a template of it (from IO2)</p>		<p>15 mins</p> <p>40 mins</p>

<ul style="list-style-type: none"> <li>• They have to answer the following questions: What is the aim of this plan? How is it used in the course of the project? Who is responsible for its implementation in the course of the project? (10 mins)</li> <li>• students move to expert groups and discuss their answers, and prepare a scheme for the presentation of the given plan. (10 mins)</li> <li>• they go back to their jigsaw group. The members of the jigsaw group present the others the features of the different parts of the project management plan: aims, content, function of the given plan type. (10 mins)</li> <li>• <b>Feedback and summary in the form of a guided conversation led by the teacher. (10 mins)</b></li> </ul> <p><i>Instruction to the teacher for the conversation:</i></p> <ul style="list-style-type: none"> <li>• <i>Ask the students: Now I am first interested in the opinion of those who did not receive the given plan, so please do not answer if you were working with it.</i></li> <li>• <i>Ask the students to not to answer the question immediately but just lift their hands if they have an idea, and wait until more of them think about it - in this case, more of them will be active.</i></li> </ul> <p><b>Questions:</b></p> <ol style="list-style-type: none"> <li>1. What can be the purpose of the requirement management/scope management plan?</li> <li>2. Why is it important to compile a stakeholder management plan? What can it influence in a project?</li> <li>3. Who can be responsible for the elaboration of the given plan? Who participates in the work (which department for example)?</li> <li>4. In case there is a reschedule in the given plan, which other plans have to be revised? (Or an example of an unforeseen event can be provided, and the class can brainstorm on its impact on the different plans.)</li> <li>5. What do you assume to be the most important type of plan?</li> </ol>		10 mins
<p><b>c) First PBL task in the classroom:</b></p>		15 mins

<p>The teams receive and study the proposals</p> <ul style="list-style-type: none"><li>• Formation of <b>groups of 4 students</b>, and <b>distribution of the projects</b>: In case it is possible, work with the project proposals created in the previous semester can be continued, but other options have to be taken into consideration as well. An important requirement is that now, fully elaborated but not implemented project proposals are needed (with established phases, stages, activities, budget).</li><li>• The group discusses the responsibilities of the team within the consortium, and within the organisation (University as environment). For example, in case of a university, one can refer to the project management office at the institution, and the framework given by the official procedures.</li></ul>			10 mins
<p>Discusses and chooses the functions and identities</p> <ul style="list-style-type: none"><li>• Info on the Storyline rules: think about choosing a fictive identity/avatar</li><li>• Which role would you like to fulfil in the PCT? Groups make decision on the roles assigned to each student within the small group, i. e. the “project coordination team” by the help of the following table:</li></ul>			
	<p>Select one from these:</p> <ul style="list-style-type: none"><li>- professional</li><li>- finances</li><li>- communication</li><li>- leader (resp. for coordination / management) expert</li></ul>	<p>The competences that enable you (i. e. your avatar) for the given roles</p>	
choice #1			

choice #2				
<ul style="list-style-type: none"> <li>• The teams compare their tables and decide together on the functions. If more students would like to be the leader, the teacher helps the group to decide. If more students would like to fulfil or avoid a certain function, the team leader appoints/convinces the students for the given function.</li> <li>• The teacher explains the homework (to prepare 1 or 2 plan/student) according to their role within the team</li> <li>• The teacher gives guidance for the team leaders to set a <b>doodle voting</b> for a team meeting (team members plus teacher included) during the following week</li> </ul> <p><b>Homework:</b></p> <p>Individual assignment: in every group, student responsible for</p> <ul style="list-style-type: none"> <li>• communication elaborates the communication management plan and identifies potential stakeholders</li> <li>• finances, starts to elaborate (and collect his questions on) resources management plan</li> <li>• professional issues, elaborates the quality management plan;</li> <li>• coordination and leadership, starts to elaborate the schedule management plan</li> <li>• team members &amp; teacher send their doodle vote until the end of the given day</li> <li>• team leader <ul style="list-style-type: none"> <li>○ prepares an agenda and send to the members who can complete it</li> <li>○ appoints a group member to write notes</li> <li>○ after the meeting, sends out the reminder to the team members and the teacher</li> </ul> </li> </ul> <p>Tasks for the meeting</p> <ul style="list-style-type: none"> <li>• As part of the project management plan, start elaborating the project scope management plan summarizing the work breakdown structure (WBS) on the base of a given Gantt chart and the project proposal (stages, outputs, partners) (table to be filled out should be included);</li> </ul>				

<ul style="list-style-type: none"> <li>○ defining concrete assignments related to the plans</li> <li>• the teacher provides the teams with a short article summarizing the main advices on how to run an effective meeting (<a href="https://hr.vanderbilt.edu/training/effectivemtgs.php">https://hr.vanderbilt.edu/training/effectivemtgs.php</a>)</li> </ul>		
---	--	--

## Lesson 3: Project management integration, Monitoring and Control

Learning outcomes to be developed:

- The student has a basic insight into some main time and project management tools and methodologies.
- The student will be able to identify and measure the resources needed for project implementation (team and their time allocation, the physical and infrastructural resources needed, plus other needs) and to integrate this information with a budget and a calendar plan (i.e. Project Management Plan).
- The student will apply methodologies and tools for effective project management, including time, people and tasks management, as well as reporting.
- The student will be able to contribute to the identification and prioritization of the management, financial and legal issues to be addressed at different stages of the project life cycle (i.e. Project Integration Management).

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Evaluation and assessment</b>	<b>Timing</b>
<p><b>a) Feedback</b> (10 mins) on the homework</p> <p><b>b) Frontal presentation of the teacher (30 mins):</b></p> <ul style="list-style-type: none"> <li>• briefing on financial management issues;</li> <li>• Demonstration of an online PM tool such as e. g. Asana, Monday, Redmine, Todoist, Notion etc see more here - teacher makes the voice in advance according to his/her preferences <a href="https://project-management.com/top-10-project-management-software/">https://project-management.com/top-10-project-management-software/</a></li> <li>• grounding the next activity (organizing a kick.off meeting): presentation of the main parts, goals, features of a kick-off meeting in 5 minutes</li> </ul> <p><b>d) PBL task:</b></p> <ul style="list-style-type: none"> <li>• Storyline new event: &lt;the execution of the project has started, the agreement is signed; the implementation of the work packages has to begin. &gt;</li> </ul>		<p>10 mins</p> <p>30 mins</p> <p>15 mins</p>

<ul style="list-style-type: none"> <li>• start the organization of a kick-off meeting, the leader discusses with the members of the project team the tasks and the responsibilities</li> <li>• Time management - with the help of a PM tool indicates the WBS.</li> <li>• they finalize the agenda of the kick-off meeting - send it with an official letter to the teacher</li> <li>• feedback on the agendas, discuss the role of RMA in the preparation and execution of the kick-off meeting.</li> </ul> <p><b>f) Exit ticket- 5 minutes</b></p> <p>With the help of Socrative, or other platforms, students fill out the exit ticket. Possible questions:</p> <ul style="list-style-type: none"> <li>• How well did you understand today's material?</li> <li>• What did you learn from today's material?</li> <li>• Answer the teacher's question (for example: mention those topics that need further clarification).</li> </ul> <p><b>ge) Explanation of the individual homework: (PBL)</b></p> <ul style="list-style-type: none"> <li>• Optional task for extra points: Make scribe notes for yourself helping to remember the main financial terms</li> </ul>																							
<table border="1"> <thead> <tr> <th>term</th><th>features</th><th>example</th></tr> </thead> <tbody> <tr><td> </td><td> </td><td> </td></tr> <tr><td>...</td><td> </td><td> </td></tr> <tr><td>...</td><td> </td><td> </td></tr> <tr><td>...</td><td> </td><td> </td></tr> <tr><td>...</td><td> </td><td> </td></tr> <tr><td>...</td><td> </td><td> </td></tr> </tbody> </table>	term	features	example				...			...			...			...			...				20 mins

## Lesson 4: Project management integration, Monitoring and Control

Learning outcomes to be developed:

- The student has a basic insight into some main time and project management tools and methodologies.
- The student will be able to identify and measure the resources needed for project implementation (team and their time allocation, the physical and infrastructural resources needed, plus other needs) and to integrate this information with a budget and a calendar plan (i.e. Project Management Plan).
- The student will apply methodologies and tools for effective project management, including time, people and tasks management, as well as reporting.
- The student will be able to contribute to the identification and prioritization of the management, financial and legal issues to be addressed at different stages of the project life cycle (i.e. Project Integration Management).

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Evaluation and assessment</b>	<b>Timing</b>
--	--	---------------

<p>a. <b>Short revision of the main points of the first lesson (10 mins):</b> the teacher prepares a crossword including 8-10 words in connection with the financial management of the project with the help of <a href="#">crossword labs</a>. The students fill out the crossword individually (5 mins). They discuss the results. (5 mins)</p>		10 mins
<p>b) <b>frontal presentation of the teacher</b> - financial monitoring and the role of RMA (the question of compulsory supportive documents - give examples for all of them); project reporting - role of RMA; communication (Closing this session, the students could talk about their style on the first team meeting.)</p>		15 mins
<p>c) <b>PBL task:</b> Storyline event: the team leader so far gets new duties within the organization which do not make possible for him/her to fulfil this role - the team has to decide on the person of a new leader. The groups have to find out a new "Storyline" event generating situation where conflict management and assertivity has to be applied: preferably in connection with the definition of the details of the budget: contracts, procurement etc. - identifying the different costs arising in the different work packages of the project. The groups have to fill out a given excel table.</p>		30 mins

Provide basic information about the project including: Project Title – The proper name used to identify this project; Project Working Title - The working name or acronym that will be used for the project; Project Manager - the person with responsibility for the successful delivery of the project to time cost and quality. Project Sponsor - the person ultimately accountable for the success of the project. Prepared by – The person(s) preparing this document; Date/Control Number – The date the plan is finalized and the change or configuration item control number assigned.

Project  
Title:

Project Working Title:

Project Manager: \_\_\_\_\_

**Project Sponsor:**

Prepared by:

Date / Control Number:

For more tips on completing this template see [WBS Excel template](#)

[illegible]

**d) Frontal teacher presentation:**

- 2 slides are recommended: the 3 types on the first, and the conclusions on the second

Each conflict management strategy will be studied by a group of 3, but members of the groups have to find each other on the basis of the information handed out to them. Every student receives a word (integrating /dominating /obliging /avoiding /compromising) or a description or an example (short situation illustrating the given conflict management type). *The handouts are being developed*

25 mins

<ul style="list-style-type: none"> <li>As all groups receive the same example for conflict situations, each group demonstrates the given conflict management way (2 students) and the 3rd provides an explanation: what is its name, advantages ,disadvantages, in what kind of situation is it useful?</li> <li>Each group presents their way of solving the conflict situation, the others evaluate and analyse the small situation practices.</li> </ul> <p>→ Reflecting on their own behaviour</p> <p>→ Re-playing or discussing the behaviours observed in the situations faced in the first half of the lesson with different attitudes/solutions</p> <p><b>Explanation of the homework:</b></p> <p>a project partner indicates that it would not be able to fully perform its tasks.</p> <ul style="list-style-type: none"> <li>How would the groups deal with the situation?</li> <li>Formal letter to the consortium, compromise on the situation, re-arrangement of the timing (Gantt as well if necessary), re-allocation of costs (letter to the national agency?)</li> </ul> <p><b>optional tasks</b> for extra points:</p> <ul style="list-style-type: none"> <li>make a 1-page crib note of the major terms on the lesson.</li> <li>write an essay of min. 400 words on reflections to their own conflict management strategies applied so far</li> </ul>		5 mins
--	--	--------

## Lesson 5: Quality and Risk Management

Learning outcomes to be developed:

- The student is aware of the concept and methodology of risk management
- The student can effectively define and articulate, brainstorm and select the most adequate management solutions and evaluate its effects in achieving the project's goals

Teaching ideas: Methods, tools, illustration, problem, game etc.	Evaluation and assessment	Timing
<b>a) Short feedback</b> (10 mins) on the homework <b>Short quiz</b> on the theoretical framework/concepts of lesson 4 (5 mins) by Kahoot or Moodle (according to the teacher's preferences)	individual work, evaluating the comprehension of the terms used in Lesson 4 (classroom test)	15 mins
<b>b) Presentation by the teacher:</b> main aspects of quality management		10 mins
<b>c) Brainstorming</b> (by virtual whiteboard) on positive and negative risks Summary of the outcome of the brainstorming by the teacher; short introduction to the next topic.		5 mins
<b>d) PBL task:</b> <ul style="list-style-type: none"> <li>• draw a risk assessment chart, identify the risks and their probability and then articulate contingency plans</li> <li>• prepare a risk management table.</li> <li>• present the chart and table in class</li> <li>• feedback on the presentations.</li> </ul>		25 mins
<b>f) PBL activity:</b> Stages of team Development (Sources: <a href="#">Mindtools</a> or <a href="#">MIT website article</a> )		

- based on the model of Tuckman discussed in Lesson 1, the students will be assigned two types of tasks: one individual and one group task
  - First, each student receives a table with the 5 phases of the model, and (s)he has to fill out the first column of it, based on his/her opinion, in which one the group is (with reasoning), which one it passed.
  - Then, the PBL group gets together and discusses the individual results.
  - The groups give a briefing on their findings.

**e) PBL activity:**

- based on the model of [Belbin](#) (1970) students get a one page long text summarizing the 9 main types of group roles.
  - On the base of the description of the text, what are the roles (max 2) you think you have fulfilled so far in this PBL team, and what do you think about the members of your teams? Use the table below for thinking about it.
  - PBL groups turn to each other and discuss the results
  - The groups formulate their questions towards the teacher regarding their results/controversions
  - (Possible question from the teacher: What are the missing roles? What are the roles on which you could not agree?)

Name of the student	Team roles perceived so far (max 2)
	#1 #2
	#1 #2
	#1 #2
	#1 #2

25 mins

5 mins

<ul style="list-style-type: none"> <li>○ Closing remarks from the teacher           <ul style="list-style-type: none"> <li>▪ these roles are dynamic, and are not necessarily remain the same in every environment</li> <li>▪ read the strengths and weaknesses featuring your type because they might help your self-awareness and personal development</li> </ul> </li> </ul> <p><b>Homework:</b> because of Covid 19, travel restrictions are introduced. The transnational project meeting is scheduled in 2 weeks. How do you handle the situation?</p> <ol style="list-style-type: none"> <li>1. Write a letter to partners, find out their intentions, find a compromise.</li> <li>2. Write to the national agency as well – find out their standpoint</li> <li>3. Prepare an infographic on the risks posed by the situation.</li> </ol>		
--	--	--

#### Further readings for the teacher

Gillian Smith, Pat Yates: Team role theory in higher education. [www.trainingjournal.com](http://www.trainingjournal.com) March 2011 <https://www.belbin.com/media/1819/tj-article-team-role-theory-in-higher-education.pdf>

## Lesson 6: Team Management and leadership

Learning outcomes to be developed:

- The student has a basic insight into the theories discussing the features and dynamics of team roles, procession and decision making
- The student will get familiar with the most important leadership models
- The student can select and apply the most adequate leadership model according to the given circumstances

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Evaluation and assessment</b>	<b>Timing</b>
--	--	---------------

<p><b>Short feedback</b> (10 mins) on the homework</p> <p><b>Frontal presentation by the teacher:</b> introduction to leadership models.</p> <p><b>Class activity:</b> leadership styles (Hersey, Blanchard) Morgeson?</p> <p>In case of Morgeson:</p> <ul style="list-style-type: none"> <li>• The teacher describes the 15 elements shortly (1 sentence each).</li> <li>• The task of the students is twofold: (1) divide the elements into 3 groups: strength, neutral, weakness; (2) (s)he chooses 1 strength and 1 weakness that characterise him/her; (s)he does the same for a groupmate as well (has to choose blindly from a paper).</li> <li>• The students discuss how to improve in the future based on the task.</li> </ul> <p><b>PBL task:</b></p> <ul style="list-style-type: none"> <li>• a new event in the Storyline: (due to a conflict or problem) the leader of the team resigns and roles in them change: an acting leader is temporarily appointed</li> <li>• the acting leader is facing a challenge:</li> </ul> <p>Tasks: distribution of tasks, agreement on deadlines, communication with project partners. Write formal letters to partners (the team leader should “sign” the letters) - have to agree on content, style, etc.</p> <p>on the base of the theories learnt, evaluating the performance of the the style and the tools of the 2 former leaders</p> <p><b>Homework</b></p> <ul style="list-style-type: none"> <li>• optional task for extra points: select (short) movie scenes presenting certain leadership styles</li> </ul> <p><b>e) Quick end-of-lesson feedback for the teacher - 5 minutes</b></p> <p>Competition by Socrative or Wordwall game with quiz questions related to the content of the lesson. <i>Results (scores) should be counted into the end of semester grade</i></p>		<p>10 mins</p> <p>10 mins</p> <p>5 mins</p>

- Team Leadership Questionnaire - Leader Edition: Improving leadership through learning  
[https://www.academia.edu/24234948/Full\\_Range\\_Leadership\\_Model](https://www.academia.edu/24234948/Full_Range_Leadership_Model)

## Lesson 7: Present and discuss a Project Management Plan

Learning outcomes to be developed:

- The student can follow the development of several simultaneous management tasks (eg. team management, cost management) and prioritize the most relevant ones at different stages of project management.
- The student is critical regarding own work and that of others taking on a constructive attitude.
- The student takes responsibility about own work.

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Evaluation and assessment</b>	<b>Timing</b>
<p>a) Presentation of homework and movie scenes selected (in the teaching material)</p> <p>Based on the movie scenes, the group discuss the different leadership styles (based on a given theoretical framework / article)- Full range of leadership</p> <p><b>PBL task</b></p> <ul style="list-style-type: none"> <li>• The groups finalize and submit their detailed project management plan</li> <li>• They present them to each other, in the form of an international webinar or stakeholder forum - we can invite for this event 2-3 representatives (in the form of online presence) of different actors related to research projects, such as <ul style="list-style-type: none"> <li>○ an RMA/financial officer from our institution</li> <li>○ a researcher from our institution</li> <li>○ a representative of a national agency dealing with the governance/allocation of a given fund</li> <li>○ representatives of a company, NGO, professional association etc. working with our university</li> </ul> </li> </ul>	<p>Peer evaluation: students give points to each others presentation with supporting arguments. Results of peer evaluation will be counted into the final grade in a limited way.</p>	

	<p>Teachers evaluation: teacher gives points</p> <ul style="list-style-type: none"> <li>• for the accuracy and adequacy of students peer evaluation</li> <li>• for the presentation</li> <li>• according to the feedback of the invited experts</li> </ul>	
--	--	--

## Module 4 – Research Impact and Public Engagement

### Lesson 1: Research Impact: why research matters?

Learning outcomes to be developed:

- The student will become familiar and differentiate several RMA facilitation roles that add value to research (such as science communication, societal engagement, technology and knowledge exchange).
- The student can explore several paths to maximise research impact (for example by finding the ways to incorporate the most relevant 17 sustainable development goals into the research project).
- The student can understand the concept of research impact and the different areas of impact beyond academia.
- The student can distinguish between output, outcome and impacts.
- The student can explain the benefits that impact-driven research can bring to the economy and society.

#### Background information to the PBL tasks

In the course of Module 4, students will work with 3 different projects:

- a **“fictive” project**: the project that was given to them in Module 3 (according to the instruction of Module 3: *“ In case it is possible, work with the project proposals created in the previous semester can be continued, but other options have to be taken into consideration as well. An important requirement is that now, fully elaborated but not implemented project proposals are needed (with established phases, stages, activities, budget)”*)
- a **“real” project**: *The universities implementing foRMAtion project select a research project within their institution which*
  - *is expected to be still running at the time of the pilot courses*
  - *is strongly related with social impact, i. e. serving a goal directly serving a public interest objective*
  - *includes significant activities related to social engagement and responsibility*
- **foRMAtion project**: *Students will write articles, prepare promotional videos on and study the dissemination strategy of foRMAtion project*

Teaching ideas: Methods, tools, illustration, problem, game etc.	Evaluation and assessment	Timing
<p><b>a ) Short introduction by the teacher (15 mins):</b></p> <ul style="list-style-type: none"> <li>Topics: research impact, impact related concepts, evaluation of research impact</li> </ul> <p><b>b) Activities helping the understanding of theoretical foundations: “Think like an activist of a Big Issue!”</b></p> <p>Individual task deepening the understanding of science impact and the SDG goals</p> <ul style="list-style-type: none"> <li>- Choose one topic from this 17 item-list: <a href="#">17 Sustainable Development Goals</a> (SDGs) , according your personal values/preferences (every goal has to be chosen by at least 1 student); in this exercise you have to think like an activist of this goal</li> <li>- Let’s suppose that your institution is running these projects (see in IO2).               <ol style="list-style-type: none"> <li><a href="#">Astronomers Capture First-Ever Image of a Supermassive Black Hole</a></li> <li>Editing genes: <a href="#">CRISPR genome editing</a></li> <li>CERN Detects the Higgs Boson: <a href="#">The Higgs Boson</a></li> <li>A Vaccine and New Treatments to Fight Ebola: <a href="#">‘Make Ebola a thing of the past’: first vaccine against deadly virus approved</a></li> <li>New Human Relatives: <a href="#">A new species of Homo from the Late Pleistocene of the Philippines</a></li> <li>Climate change: <a href="#">The last five years were the hottest ever recorded</a></li> <li>New space missions: <a href="#">Underground Lake of Liquid Water Detected on Mars</a></li> <li>Fossilized Pigments Reveal the Colors of Dinosaurs :<a href="#">The Colors of Dinosaurs Open a New Window to Study the Past</a></li> <li><a href="#">40,000-year-old cave art may be world's oldest animal drawing</a></li> <li><a href="#">Lock the Planck: the kilogram has a new definition</a></li> </ol> </li> <li>- Review this list of scientific achievements from the aspect of the SDG goal you are fighting for, on the base of the following questions: What are the achievements               <ol style="list-style-type: none"> <li>that serve the given goal,</li> </ol> </li> </ul>		<p>15 mins</p> <p>30-40 mins</p>

<p>2. that could be connected with it</p> <p>3. that are against it</p> <ul style="list-style-type: none"> <li>- Prepare a scheme for a 1-minute-long speech (elevator pitch) to be presented at an internal management meeting for the 15 top leaders of your institution.</li> <li>- summarize your arguments and thoughts in a convincing way</li> <li>- Present your speech in front of the class who will have the opportunity to defend the interests of the project in question</li> <li>- In case of disagreement, listen to each other's arguments and reflect on them in a polite though persuasive way, e. g. by offering compromises, alternative solutions etc.</li> </ul> <p><b>c) Storyline task (25 mins):</b> &lt;challenge/task&gt;</p> <ul style="list-style-type: none"> <li>• the groups prepare a mindmap for their project (that they had been working in the course of Module 3)</li> <li>• assign and indicate SDGs and possible impacts to their project and indicate them on the mindmap</li> </ul> <p><b>e) Quick end-of-lesson feedback for the teacher - 5 minutes</b></p> <p><u>Wordwall</u> game with quiz questions related to the content of the lesson.</p> <p><b>f) Individual homework /PBL task:</b></p> <p>Write a short article (of min. 150 words) to be published on your project website presenting your project from the aspect of the SDGs:</p> <ul style="list-style-type: none"> <li>• Which are the SDGs that are fostered by your research activities?</li> <li>• How will this be implemented?</li> <li>• What are the expected results in this area?</li> </ul>		<p>25 mins</p> <p>5 mins</p> <p><i>Results (scores) should be counted into the end of semester grade</i></p>
--	--	--

## Lesson 2: Responsible Research and Innovation approach: the EU drivers for Impact

Learning outcomes to be developed:

- The student can explain Responsible Research and Innovation (RRI) principles and practices in its main thematic elements: public engagement, open access, gender, ethics, science education, science communication and engagement, and impact.
- The student can identify cross-cutting issues in a given project (e.g. ethical and gender issues) and identify different strategies to address them in different research projects.
- The student can argue about the reasons for promoting accountability, responsibility, ethics and integrity in research.
- The student can contribute to the design of activities and instruments fitted to each of the RRI principles.

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Evaluation and assessment</b>	<b>Timing</b>
--	----------------------------------	---------------

<p><b>a) Classwork: frontal presentation &amp; brainstorming</b></p> <ul style="list-style-type: none"> <li>• identify ethical issues that can emerge during the project – and how to solve them.</li> <li>• Possible topics: GDPR, issues that might emerge in connection with interviews, etc.</li> <li>• generating a debate where students can come up with pro and con arguments</li> <li>• concrete examples related to ethical issues regarding the “real project” (see <a href="#">here</a>) will be discussed in the presentation below (b))</li> </ul>		10 mins
<p><b>b)</b></p> <p><i>The universities implementing foRMAtion project select a research project within their institution which</i></p> <ul style="list-style-type: none"> <li>• <i>is expected to be still running at the time of the pilot courses</i></li> <li>• <i>is strongly related with social impact, i. e. serving a goal directly serving a public interest objective</i></li> <li>• <i>includes significant activities related to social engagement and responsibility</i></li> </ul> <p>Activity related to the chosen project:</p> <ul style="list-style-type: none"> <li>• invitation of an RMA of the give project team who gives a 10 minutes long presentation on the project, in line with the following topics (these have to be sent the expert in advance, as well as two resources that will be used in the following lessons: The six main categories of purpose for public engagement and D3.2 Public Engagement Methods and Tools of Engage2020) <ul style="list-style-type: none"> <li>○ <u>Basic info</u> on the project: source of the grant, programme, duration, partners, results so far</li> <li>○ Why did you launch the project, what was the idea behind it? What are the main goals of your project? How does it serve public goals /society?</li> <li>○ Who are the target groups and the involved <u>stakeholders</u>?</li> <li>○ How did you find the way to the stakeholders, how did you address them?</li> <li>○ What are the platforms and the means of <u>dissemination</u>, who are the target groups of the dissemination?</li> <li>○ Ongoing and next project tasks, especially in the field of communication</li> </ul> </li> </ul>		25 mins

<ul style="list-style-type: none"> <li>○ What are/can be the purposes of the engagement of the project with the given stakeholders, according to the 6 categories?</li> <li>○ What are the main main messages that you would like to transfer to them.</li> <li>○ What kind of information do you include in your messages and in which channels in order to emphasize and support your message?</li> <li>○ Challenges and the ways to tackle them, especially in the field of ethics and conflict of interests</li> <li>○ <u>Ethical issues</u> emerged</li> <li>• Questions and answers by the students</li> </ul> <p><b>PBL/Storyline activities</b></p> <ul style="list-style-type: none"> <li>• The new and last team leader is finally appointed by the fictive “senior manager” - the new leader should be the 4th student, preferably the one who has been responsible for communication so far. In his e-mail, the senior leader justifies his choice with the fact that in this phase of the project, expertise in the field of communication is essential.</li> <li>• PBL activities:</li> </ul> <p>In Module 4, an important output of students’ activities will be a promotional video that will present students' experiences on foRMAtion project to different target groups and stakeholders such as</p> <ul style="list-style-type: none"> <li>- an international professional organization, e.g. EARMA,</li> <li>- BA students of their university (aim: to promote the course within the university)</li> <li>- the top management of their own institution (aim: to raise awareness regarding RMA as a profession and to promote the project within the institution)</li> <li>- an NGO or company or a national EU funding agency working in cooperation with the university in other projects or activities (its aim is to raise awareness regarding RMA as a profession and promote the university’s training in this field).</li> </ul> <p>Each PBL group will prepare a separate, 2-3 minutes long video, addressing a different target group. They will define and formulate the message and</p>		50 mins
---	--	---------

<p>choose the style of the video according to the relevant strategies of foRMAtion project.</p> <p>Tasks for this lesson:</p> <ol style="list-style-type: none"> <li>1. Read the article identifying the six main categories of purpose for public engagement <a href="https://www.publicengagement.ac.uk/doing-engagement/quality-engagement/purpose">https://www.publicengagement.ac.uk/doing-engagement/quality-engagement/purpose</a></li> <li>2. Study the dissemination plan (relevant strategic document) of foRMAtion project <ul style="list-style-type: none"> <li>○ What are/can be the purposes of the engagement of foRMAtion project with the given stakeholder?</li> <li>○ On the base of your conclusions, formulate 2-3 main messages that the video of your team should transfer.</li> <li>○ What kind of information should be included in your video in order to emphasize and support your message?</li> </ul> </li> </ol> <p><b>Homework:</b></p> <ul style="list-style-type: none"> <li>• PBL teams further develop their answers for the questions above (PBL/Storyline activities)</li> </ul>	<p>Until the next class, teacher sends feedback, correction &amp; evaluation for this homework, as students will work with it in Lesson 3</p>	
--	---	--

## Lesson 3: Pathways to research: planning a strategy for public engagement

Learning outcomes to be developed:

- The student is aware of the major elements and characteristic features of a research engagement plan and the key performance indicators.
- The student will be able to map the different target stakeholders and its roles at different stages of the research project
- The student is able to select the engagement strategies, platforms and communication style suited for each target audience.

Teaching ideas: Methods, tools, illustration, problem, game etc.	Methods for evaluation and assessment	Timing
<p><b>a) Frontal presentation by the teacher (15 mins)</b>, explanation on the base of questions</p> <ul style="list-style-type: none"> <li>• public engagement strategy - purpose, stakeholders, process and evaluation.</li> <li>• The 6 stages/levels of public engagement on the base of the introduction of <a href="#">D3.2 Public Engagement Methods and Tools of Engage2020</a> (pages iii-xi) such as Dialogue, Consulting, Involving, Collaborating, Empowering, Direct decision</li> </ul>		15 mins
<p><b>b) Case study</b> - public engagement plan (PEP) of the “real” project presented in Lesson 2. In case they do not have one, the students study the institutional PEP of their university OR the dissemination strategy of foRMAtion project OR the PEP of another institution or project</p> <ul style="list-style-type: none"> <li>• in groups of 2, students are given the public engagement plan</li> <li>• they have to identify the purpose, stakeholders, activities based on the documents.</li> <li>• They answer the following questions on the base of the examples of the tables published in <a href="#">D3.2 Public Engagement Methods and Tools of Engage2020</a> (pages iii-xi): What is the level of public</li> </ul>		30 mins

<p>engagement targeted by the document you are studying? How could you further develop/complete this plan?</p> <ul style="list-style-type: none"> <li>• discuss findings in class (the groups prepare a short summary (table, graph) on the criteria given to them)</li> </ul> <p><b>c) PBL task on PEP:</b> The groups start preparing the Public Engagement Plan (PEP) of their “fictive” project (the one they have been working on from the beginning of the semester) in the form of a mindmap.</p> <ul style="list-style-type: none"> <li>• They will use a template given by the teacher. (Question to NOVA: can you suggest a basic plan /example that we can use for this purpose?)</li> <li>• they decide on the main parts of the plan and the leader of the team shares the tasks among the students that they have to prepare as a homework</li> </ul> <p><b>d) Feedback on the homework</b></p> <p><b>e) PBL task related with the promo video:</b></p> <ul style="list-style-type: none"> <li>• the teams decide on the tasks related with the video-making: editor, cameraman, graphic elements, actors etc. All members has to be responsible for the content/text.</li> <li>• On the base of the homework and the classroom work, answering the following questions:             <ul style="list-style-type: none"> <li>◦ What are/can be the purposes of the engagement of foRMAtion project with the given stakeholder? (see the 6 main purposes)</li> <li>◦ What should be the level of public engagement in relation with your target group?</li> </ul> </li> <li>• On the base of the above and the homework, formulate 2-3 main messages that the video of your team should transfer.</li> <li>• What kind of information should be included in your video in order to emphasize and support your message?</li> </ul> <p><b>e) Homework</b></p> <p>1. Preparing a given part of the PEP of the “fictive” project, according to the instructions of the team leader</p>		<p>20 min</p> <p>5 mins</p> <p>20 min</p>
--	--	---

<p>2. Each student reflects on his own leadership style on the base of the <a href="#">Team Leadership Questionnaire by Morgeson (2010)</a>. This will be used in the course of the next lessons's classroom work.</p>		
--	--	--

<ul style="list-style-type: none"> <li>Finalization of Public Engagement Plan of the “fictive” project</li> <li>Evaluation of leadership skills using the <a href="#">Team Leadership Questionnaire by Morgeson (2010)</a> using the “hot seat” method: someone is chosen to be evaluated; the other 3 writes down their thoughts on the base of the following questions: <ul style="list-style-type: none"> <li>a) What were his strengths as a leader?</li> <li>b) What are his areas of development?</li> <li>c) What I enjoyed/appreciated in him personally?</li> </ul> </li> </ul> <p>The teacher has to enhance that the goal of the evaluation is to encourage each other and give each other feedback in a positive way.</p> <p><b>Homework:</b></p> <p>PBL groups work on and finalize their promotional videos according to the feedback of the teacher.</p> <p>Optional task for extra points: design a Facebook page for the project (based on a given framework - not a public one)</p>	<p>Apart from the teacher, a member of the “real” project coordination team gives students evaluating feedback as well</p>

## Lesson 5: Public engagement plans – group presentation and discussion

Learning outcomes to be developed:

- The student can act to facilitate processes in the context of a simulated science engagement situation.
- The student can design a research engagement plan and identify suitable key performance indicators to assess stakeholder engagement.

<b>Teaching ideas:</b> Methods, tools, illustration, problem, game etc.	<b>Evaluation and assessment</b>	<b>Timing</b>
<p><b>a) PBL task:</b>  Presentation of the promo videos. They will present students' experiences on foRMAtion project to different target groups and stakeholders such as</p> <ul style="list-style-type: none"> <li>- an international professional organization, e.g. EARMA,</li> <li>- BA students of their university</li> <li>- the top management of their own institution</li> <li>- an NGO or company or a national EU funding agency working in cooperation with the university in other projects or activities (aim is to raise awareness regarding RMA as a profession and promote the university's training in this field)</li> </ul> <p>in the frame of</p> <ul style="list-style-type: none"> <li>• an international webinar (if the dates can be reconciled among the 3 universities) presenting the project</li> <li>• OR: a fictive stakeholder/workshop forum where the class members will play the role of the several stakeholders</li> </ul> <p><b>b) Course-evaluation roundtable</b> (including the report of the teacher as well):</p> <ul style="list-style-type: none"> <li>• “What were the most important things you learnt in this course?”</li> <li>• “Share something you liked and appreciated.”</li> <li>• “What are the areas where we could further improve it?”</li> </ul> <p><b>PBL homework:</b></p>	<p><i>Peer assessment:</i></p> <ul style="list-style-type: none"> <li>- students give points to each others videos on the base of the evaluation form.</li> <li>- In case the videos of the parallel courses (NOVA &amp; Sapientia) cannot be presented, students give oral feedback regarding each others' videos.</li> </ul> <p><i>Teachers'</i></p>	

<p>Groups have to submit</p> <ul style="list-style-type: none"> <li>the updated and finalized project management plan until a predefined deadline</li> <li><i>Optional assignment: a report on the project results compiled on the base of the form prepared by the teacher (see Annex...)</i></li> </ul>	<p><i>question launching the conversation: “Which features of the video that reflect the aspects and the needs of the given target group?”</i></p>
