

**HOW TO BECOME A  
PROJECT MANAGER  
AND HAVE FUN FROM  
IT?**

---

Wojciech Dąbkowski

# CONTENTS

1. Main aim of the project
2. Work developed
3. Description of the profession
4. Main findings
5. Final product
6. Self-assessment

# MAIN AIM OF THE PROJECT

---

- Discover the profession of the Project Manager
- Find the proper way to become the successful Project Manager
- Find out if I have a chance to become a Project Manager with my set of skills

# WORK DEVELOPED

Come up with a project topic

Self research about the Project Manager as a profession

Look into the professional portfolios

Done 2 interviews with professional Project Managers (Ms Zsuzsanna Angyal and Mr Jose Santos)

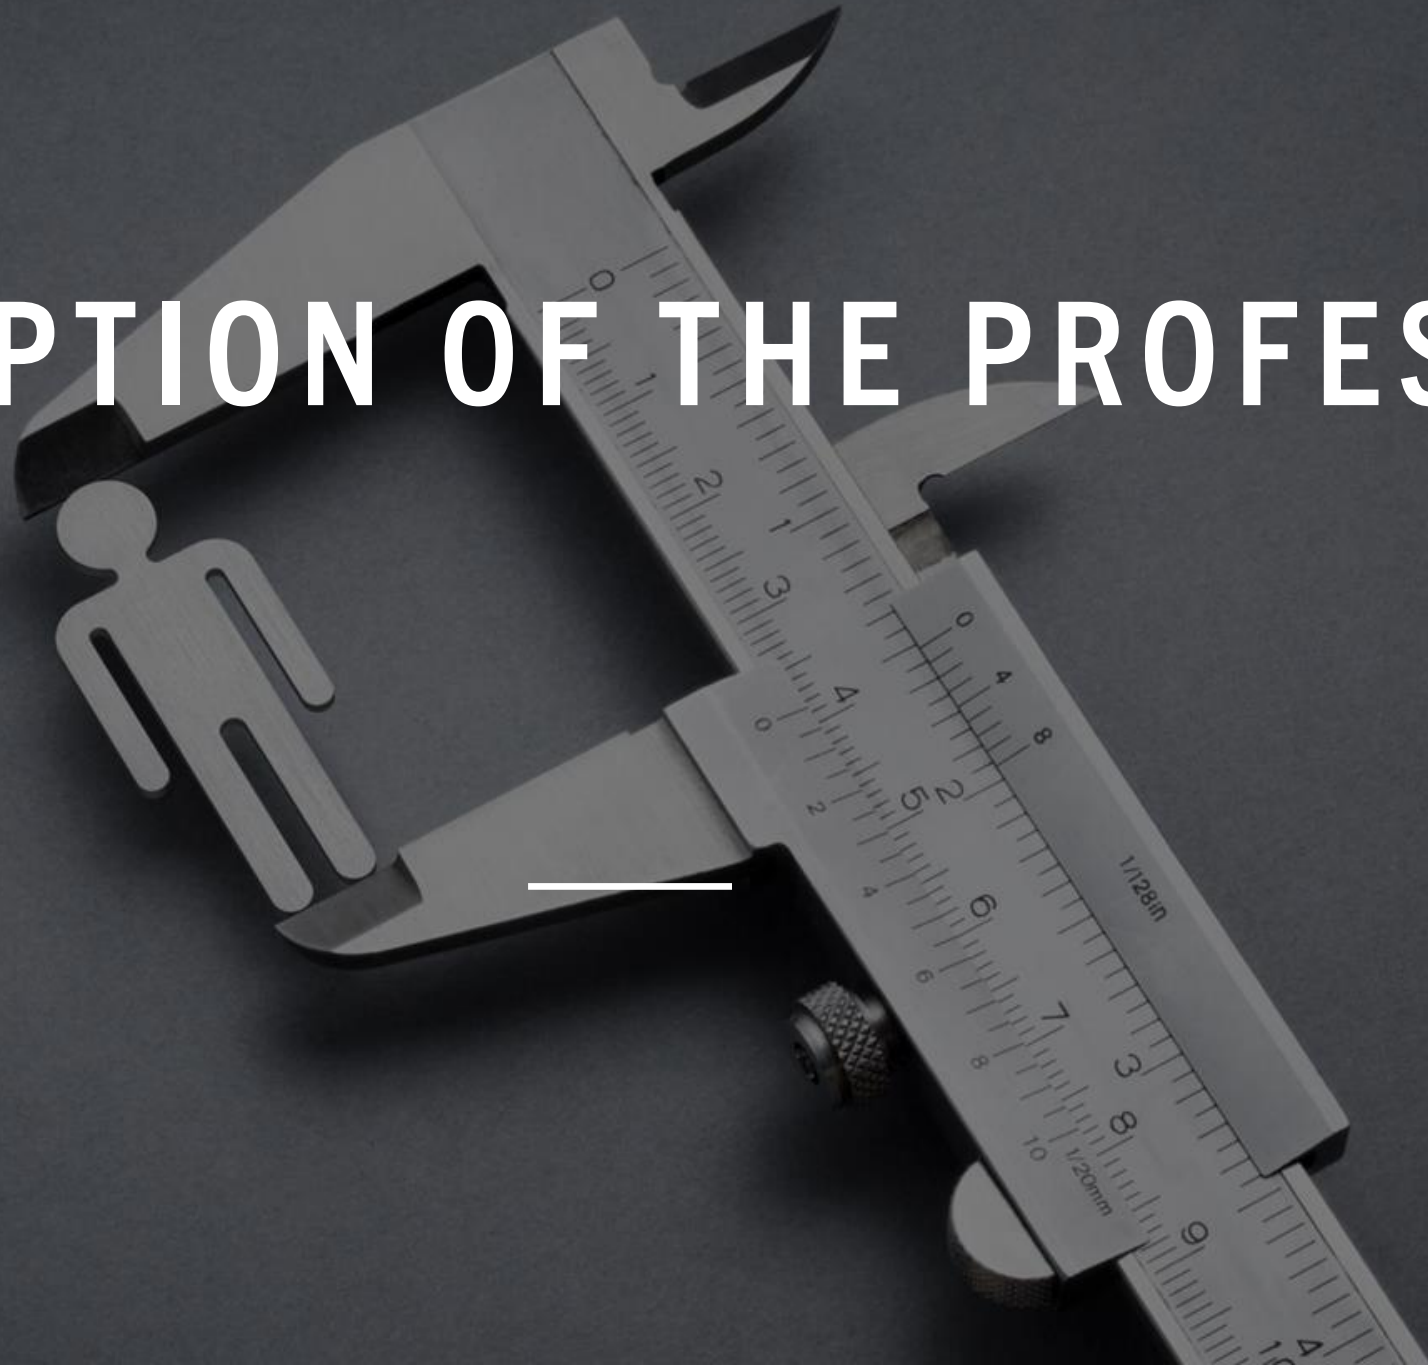

Comparison my skills and abilities with those which Zsuzsanna and Jose told me about

Figure out what I gained and achieved from that project

# DESCRIPTION OF THE PROFESSION

# WHO THE PROJECT MANAGER IS?

Someone who helps to full fill the objectives of the project

The person which keep under control the balance, the schedule, the costs, the scope, the quality of the project

Someone who need to see the project from above; from step one to the ending

The Project Manager is someone who oversees the whole process of the project

The person who is in touch and contact with everyone who are working in the project

Someone who check the progress on every step of the project

# MAIN TASKS AND RESPONSIBILITIES

- to keep the project under control
- It means to have eye on the all costs, the timetable, quality of the project
- to keep the balance between aim and objectives, checking if they are being filled
- Project Manager is like a "maestro" in orchestra
- monitor and then control the work of participants
- need to know rules and regulations of the project you are dealing with
- someone who is responsible for managing a piece of work from concept to delivery.

# NECESSARY SET OF SKILLS AND ABILITIES

soft skills are the most important part of that job

Language skills

Social skills-  
ability to cooperate with people

Patience and tolerance

skill to manage the conflicts

Being varsity and adaptable to new things and people

ability to think out of the box

willingness to sacrifice

## MAIN FINDINGS

The job of Project Manager is not for everyone- you need to be well-qualified to become good PM

I didn't think that profession of Project Manager is connected with that amount of travels like it is in reality

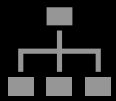

As the Project Manager you don't need to understand and know everything

That's not a profession for me

# FINAL PRODUCT- HOW TO BECOME PM?

There are two main roads on the career path to becoming a project manager

1) the “traditional” route — set out to become a project manager, get a qualification, and take a role as a project manager

2) keep gaining project management experience and working your way up the project management career ladder without a degree, certification, or other “classical” project manager education.

# S E L F - A S S E S S M E N T

---

It was difficult to contact with professional PM's

---

if I were more well-organized person I would get more out of this project

---

Time management is the thing I need still to improve

---

I was interested in conducting the interviews and it gave me great pleasure (maybe the journalist's studies?)

---

The profession of project manager is not for me
