

WHAT IS A RESEARCHER?

Looking
for an
Answer

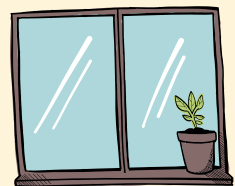

Hello!
My name is Susan.
I am 10 years old.

I love reading and discovering
something new.

Just like my uncle Ben.
He is a resarcher.

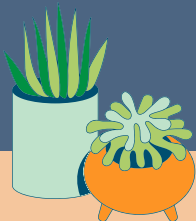

Do you know what a
Researcher is? I believe
you may have heard
about them before....

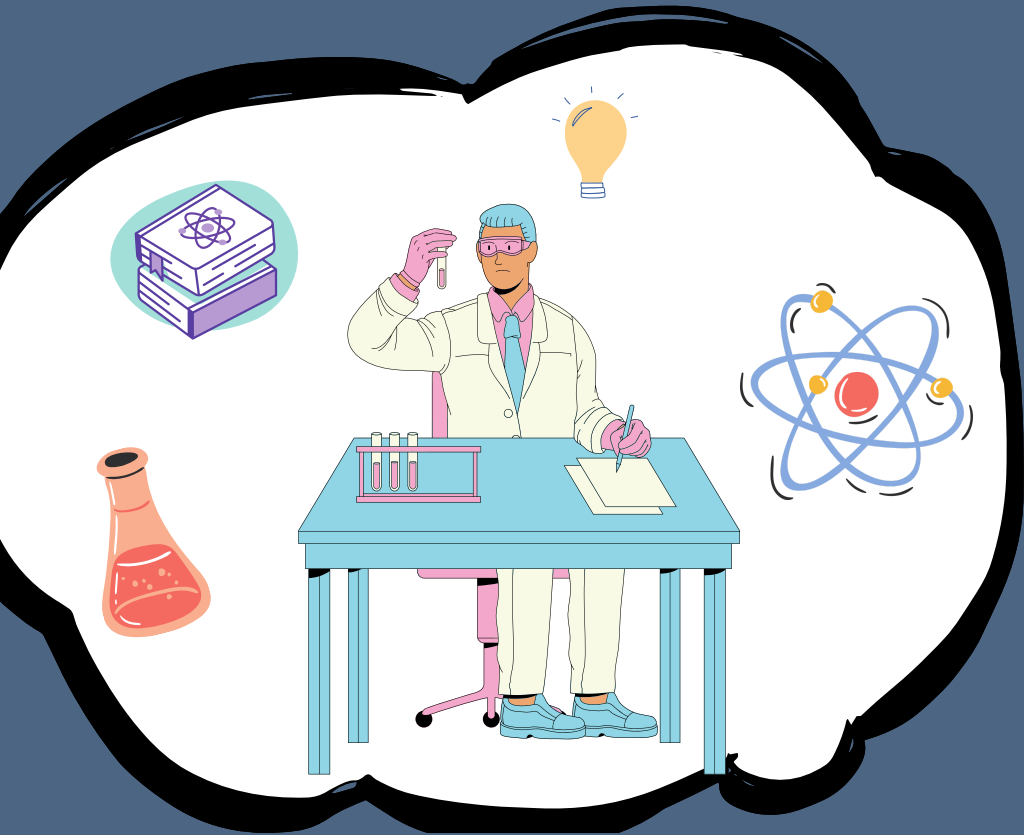

I wonder...

How would you describe a researcher?

When I think about
researchers, I think of
somebody doing experiments
in a labor.

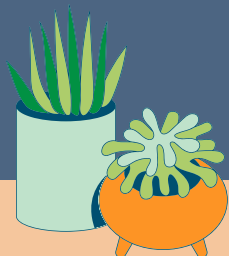

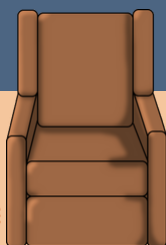

In my Imagination they
wear a white coat,
glasses and gloves.

But wait my uncle Ben
doesn't wear a white coat
or wears gloves...

Maybe I should
ask him what
researchers
do...

Hey Ben!

Hey Susan!

I have a question.
I know you are a researcher,
but I've never seen you in a
white coat or wearing gloves.

Yes, that's true.

I am a researcher, but being
a researcher doesn't mean
you have to wear a coat or
gloves all the time.

Oh really?

I thought every researcher is wearing a coat, gloves and glasses to protect themselves while doing an experiment?

No, not every researcher is working in a lab and experimenting with dangerous chemicals.

There are lots of different types of researchers.

Oh really? What kinds of Researchers do exist?

So many. I don't even know if I could list all of them. I am for example an educational researcher.

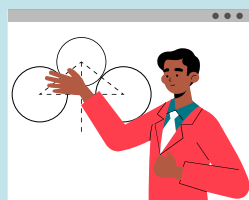

I am doing research on everything that has to do with learning, school systems and teaching.

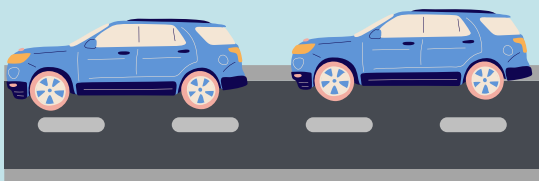

Most of the time I am working in an office or even at home.

A researcher can be anything from searching after medicine to...

to searching for solutions to traffic issues...

to an meteorologist researcher who observes the weather, climate and the atmosphere,...

Hmmm..., but if they are so different, why are they all called researchers?

You are right. They all do different things, but they all have something in common too.

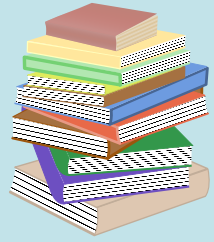

Oh, I don't know?

Can you guess what it is?

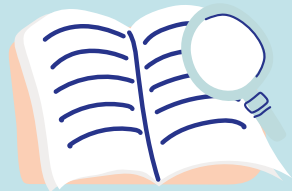

Wait, I think I know. They are all trying to find solutions to different kind of problems.

Yes, that's true. They are also always asking questions and looking for evidence to back up their theories.

Oh that's sound really interesting. Could I become an rearcher?

Of course, you can. You already have one of the most important qualities a researcher should have.

Oh really? What is that?

Being curious.

True... Maybe I should become an researcher since I am really curious.

What about you? Do you want to become a researcher?

WHAT
DO YOU
THINK?
